Welcome to the Oregon Agritourism Handbook

This site was created for a wide range of people with a common interest in the intersection of agriculture and tourism. So whether you’re a farmer or rancher (or an aspiring one), have a tourism business that works with farmers and ranchers, or are a budding entrepreneur with no land but an agritourism venture idea, this site is for you.

If you’re just starting out, you may want to work through the information in the order of the Table of Contents shown to the right. If you have an existing operation, just skip around to the sections that seem most relevant. You can download and print whatever you need.

What do we mean by “agritourism?” While the term “agritourism” just entered the Merriam-Webster dictionary in 2006, the activity has a rich history. Basically, agritourism is any activity that generates supplemental income for working farms and ranches by connecting their agricultural resources and products with visitors. It includes on-farm and off-farm activities. To borrow from California’s language*, agritourism “promotes farm products and generates additional farm income, in the process of providing visitors with entertainment, recreation, hands-on participation and education.”

Here in Oregon, where culinary tourism is already a major draw, we incorporate elements of culinary tourism into agritourism. Here, tourists participate in agritourism when they experience a working landscape by visiting a farm or ranch, or via authentic local flavors by meeting the producer and/or tasting the product.

Oregon statutes define agritourism more narrowly from a legal and regulatory perspective, permitting very specific activities on exclusive farm-use (EFU) land. For the purposes of compliance, Section III of this handbook is geared toward this narrower definition.

This handbook focuses on gearing up for “tourists,” as opposed to local residents. Travel Oregon uses a specific definition of “tourist” to differentiate their activity from that of local customers: Tourists travel at least 50 miles from home, or they stay overnight at their destination. That’s not to say that local residents don’t visit local farms and ranches. But visitors from outside your area bring new dollars into your community. That’s our focus here.

This handbook is brought to you by the Oregon Agritourism Network, established in 2015 to grow high-quality Oregon agritourism, guided by these goals and vision for the future. Please check back in the future, as the handbook will be regularly improved and updated. If you’d like to see or contribute additional information, please contact Alexa Carey at Alexa@TravelOregon.com.

*An often-used definition of agritourism is included in Agritourism and Nature Tourism in California, a publication of the University of California’s Small Farm Center. The full definition specifies activities that occur on a working agricultural or horticultural operation. Here in Oregon, we also consider some off-farm/ranch activities to fall under the agritourism umbrella.

A Brief History of Agritourism, Internationally and in the United States

INTERNATIONAL AGRITOURISM

Excerpted with permission from Chapter 2, Colorado Cultural, Heritage and Agritourism Strategic Plan, 2013

“As populations increase and the cost of land and labor skyrockets, farmers and ranchers across the U.S. are following the lead of Europe, Australia and New Zealand, turning to agritourism as one way to diversity their revenue. In Italy, this business is termed “Agriturismo,” and in Britain, Australia and New Zealand it is known as “farm stay holidays.”

As small-scale farming became less profitable in Italy in the 1950s to 1970s, farms were abandoned when farmers left to search for work in larger towns and cities. An agriturismo law was passed in 1985 to regulate and encourage Italian farm stays. Estimates place today’s number of agriturismo locations in Italy between 9,000 and 20,000, and their success has led many other European Union countries to enact similar national policies to help increase farm income and create jobs in rural communities. There are three types of agriturismo classifications in Italy; one that provides light meals or self-service snacks; one that offers full-service meals; and one that provides farm holidays that include meals, lodging and other activities. In Italy, agriturismo farmers are also allowed to sell value-added farm products including locally produced wines, olive oils, pasta, prepared meats, cheeses, jellies and jams, honey, baked good and crafts.

One subset of farm stay holidays currently attracting many young travelers is called WWOOFing. This acronym has variously meant “‘Working Weekends on Organic Farms,” “Willing Workers on Organic Farms” and, most recently, “World Wide Opportunities on Organic Farms.” WWOOF was established in the fall of 1971 when a secretary in London organized a working weekend at a farm as an affordable way to get to spend time in the British countryside. Currently, there are 1,634 WWOOF farms located in 43 different countries, and the numbers are growing.”

AGRITOURISM IN THE UNITED STATES

Excerpted with permission from Considerations for Agritainment Enterprise in Georgia, 2002 and the Colorado Cultural, Heritage and Agritourism Plan

“Agritourism and entertainment farming enterprises have an extensive history in the United States. Farm-related recreation and tourism can be traced back to the late 1800s, when families visited farming relatives in an attempt to escape from a city’s summer heat. Visiting the country became even more popular with the widespread use of the automobile in the 1920s. Rural recreation gained interest again in the 1930s and 1940s from folks seeking an escape from the stresses of the Great Depression and World War II. These demands for rural recreation led to widespread interest in horseback riding, farm petting zoos and farm nostalgia during the 1960s and 1970s. Farm vacations, bed and breakfasts, and commercial farm tours were popularized in the 1980s and 1990s.

The demand for a slower-paced farm experience, once supplied by rural family members, seems to be somewhat difficult to satisfy today because of the four- and five-generation gap between farming and non-farming citizens.” (Georgia)

“Today, with fewer farmers producing more food, people have become disconnected from the sources of their food. Agritourism offers a new way to fulfill the desire to reshape this food/source connection. This past decade has seen tremendous growth in the number of statewide agritourism programs in the United States.” (Colorado)
Goals and Vision for Agritourism in Oregon

OREGON AGRITOURISM: OUR VISION FOR 2025

• Oregon is recognized as a world-class destination for interesting, educational, fun and life-changing food, farm and ranch-based experiences.

• Visitors find diverse, accessible and high-quality opportunities to experience excellent food and bountiful landscape throughout the state.

• It’s easy for Oregon visitors to explore, dine and experience life on a farm or ranch, and to connect agritourism experiences with other nearby activities and attractions.

• While agriculture remains the primary function of farms and ranches, exposure to visitors through agritourism enhances these operations.

• The success of agritourism brings increased prosperity to Oregon communities.

GOALS FOR THE OREGON AGRITOURISM NETWORK

Improved Policy

The state and local regulatory framework for agritourism is clear and improved, so agritourism businesses that are compatible with the intent of land-use law and public health regulations are able to operate efficiently.

Effective, industry-driven network

Agritourism businesses are well networked with each other to produce exceptional visitor experiences, promote their offerings, learn best practices and pursue supportive policies.

Targeted marketing

Oregon has implemented a strategic agritourism marketing plan that is appropriately connected with culinary tourism marketing.

Meaningful standards

Based on a clear definition of agritourism (including its crossover with culinary tourism), locals and visitors can discover agritourism products and services that have been vetted for authenticity and quality.

Stewardship education

Young people have a close and knowledgeable connection with the state’s agricultural sector as part of Oregon’s history, culture, health and economic vitality.

Economic impact

Agritourism tangibly contributes to the vitality of Oregon agriculture and communities.
Why Consider Agritourism?

Agritourism isn’t for everyone, but there’s a growing market—and where there’s a fit for your farm, ranch or business, it provides many opportunities for creative products and services. This section provides background information on the market for agritourism, the pros and cons of expanding into agritourism, and a laundry list of possible activities to consider. When you’re done, you should have an initial sense of what form your agritourism enterprise might take.

MARKET TRENDS FOR AGRITOURISM

- Why People Travel
- Market Trends for Agritourism: Information from Other Regions
- The Oregon Agricultural Traveler: What We Know in 2015 (PowerPoint; data from Travel Oregon research)

WHAT TO EXPECT

- Benefits and Challenges with Agritourism Enterprises

Note: Travel Oregon will be commissioning an Agritourism Economic Impact study in 2017. This will be added to the Handbook when complete, to provide insight on earnings potential.

FOOD FOR THOUGHT

According to the Vermont Agritourism Collaborative’s “Assessing Your Farm for Agritourism” guide, the following factors contribute to the well-being of farmers. How does your agritourism enterprise stack up in terms of delivering these benefits?

- Goals that are based in deeply held values
- An atmosphere with good communication and mutual respect
- Reliable access to information and services that support the business
- A symbiotic connection between the farm/ranch and its community: the community provides value to the farm and the farm provides value to the community
- Good relationships with employees and neighbors
- A long-range view with the well-being of the next generation in mind
- Taking time to enjoy one’s self, family and friends

IDEAS TO STIMULATE YOUR THINKING

- Checklist: Types of Agritourism Activities
- Community Success Stories in Culinary & Agritourism

traveloregon.com
Why People Travel

In thinking about the experience you hope to create for your visitor, it’s helpful to know what visitors are seeking. The following list shows the reasons people travel. Most content is adapted with permission from the Agri-Business Council of Oregon’s Agritourism Workbook (revised in 2007).

To build and strengthen relationships
The primary reason Americans travel on vacation is to spend time with family. They want to be together in stress-free surroundings, and they consider a trip away from home to be the ideal opportunity. They view travel as a time to rekindle and strengthen their relationships, as well as an opportunity to make new friends.

To improve health and well-being
Vacations are vital to travelers’ physical and mental well-being. They seek an experience that gets their blood pumping or their mind cleared. Many Oregon travelers do this by participating in outdoor activities.

To rest and relax
Americans on vacation want to rest and relax. A trip away from home is a trip away from work and worry. When they return, they feel refreshed and renewed.

To experience adventure
Some travelers vacation away from home to find adventure. They want their vacations to provide excitement, be it dangerous or romantic.

To visit places they have read about or seen through media
Travel-related visuals can incite a sense of “wanderlust” that inspires an intense desire to physically visit a destination. Social media, television and internet sites highlight a diversity of options that can incite that travel bug—as well as highlight hidden gems outside the typical well-known destinations.

To escape and find connection
Many people travel to escape daily routines, worry and stress, and to attain what they sense is missing in their lives (Krippendorf 1986). They seek something different: perhaps a better climate, a slower pace of life, cleaner air, prettier scenery or quieter surroundings. This connection can be to other people, the environment, or themselves and their purpose.

To check something off their bucket list
Travel can be a major focus for those who have created a list of personal milestones and accomplishments to complete. For example, it is common for Europeans to want to visit EVERY U.S. national park. Completing a travel-related bucket list item can be a source of external bragging rights, or provide a sense of accomplishment.
To learn
Better-educated travelers travel to learn and discover. They want to see, hear, touch and feel unfamiliar things. More specifically, they want to learn or practice a language, study a culture, explore gourmet foods or wines, investigate spirituality, etc. Visitors want to meet people from other cultures and be exposed to new perspectives, and acquire an understanding of a different culture’s lifestyle, food and daily life.

To mark a special occasion
Many Americans vacation away from home to celebrate life milestones and special occasions. New relationships, marriages, birthdays and professional achievements provide a reason.

To save money or time by traveling locally
People sometimes take short, local vacations to save money or time. Some vacationers are very frugal. Some vacationers want to enjoy a “staycation” to stretch their vacation dollars and reduce travel. Sometimes travelers will seek an opportunity to combine a work-related trip with a visitor experience, not only to see the area beyond the office or meeting location but to expand the cost-effectiveness of the trip.

To reminisce
Travel can evoke the past. Some vacationers—particularly older ones—visit a farm to rekindle memories of the simple rural lifestyle they once knew. Although these people do buy food, lodging, transportation and souvenirs, they are primarily purchasing a sentimental journey.

To view nature
A recent U.S. Fish and Wildlife survey reported that nature tourists view wildlife to observe nature’s beauty, relax from daily pressures, get away from home, and be with family and friends. (Leonard 2008) Social interaction and relaxation are particularly important, sometimes secondary only to seeing wildlife. These tourists like learning about nature, being physically active and meeting people with similar interests.

To visit places they have heard about from friends and family
Recommendations from friends and family are a strong motivator in selecting a location for travel. Endorsements help travelers select locations, because they know their friends and family have vetted the location based on common interests and general qualities like safety and the amount and type of amenities.
Market Trends for Agritourism: Information from Other Regions

Agritourism can attract visitors with diverse interests and market profiles. This is because “agriculture is one of the few industries that tap our connections with the natural world as well as our cultural past. Farms are unique repositories of biological, historical and cultural wealth, and thus hold a fascination for many people. Agritourism provides an opportunity for people to experience a real change of pace, get closer to nature, learn how food is produced and farmers live, and have a good time and memorable experience while doing it.” (Washington State University Extension—Agritourism: Cultivation Tourists on the Farm, 2008)

The big picture is that Oregon’s farms and ranches are well positioned to take advantage of many favorable market trends. At the same time, there are differences in market opportunities based on specific location and amenities. This document summarizes market trends from several state and national-level studies. For more detailed trend information, refer to the reference documents. As new data becomes available, it will be added to the Toolkit, and will include Oregon’s planned 2017 Agritourism Economic Impact Analysis.

SOCIAL TRENDS THAT FAVOR AGRITOURISM

Much of what draws national and international visitors to agritourism is already strong in Oregon. Our state has a strong appreciation for good food, offers easy access to nature, and celebrates local culture. These intrinsic characteristics are the basis for authentic agritourism experiences.

Growing interest in knowing the source of food and how it is produced

• Nutrition
• Health and safety
• Environmental resiliency
• Interest in strong food systems and “buying local”

The rise of artisan production and respect for “making/makers” versus consumption

• Small-scale producers and small-batch production
• Niche products
• Value-added products
• Not limited to food

Food and travel as a cultural experience

• Slow food movement—savor each bite
• Desire to experience an “authentic sense of place”
• Especially for international travelers, experience “The West”
• Interest in interactive learning while on vacation

Technology overload

• “Unplugged” family time
• Nostalgia for traditional skills and lifestyles
• Reconnecting with nature
• See stars in the dark open skies
TOURIST ACTIVITY TRENDS

Travelers interested in agritourism share an interest in several other types of tourism. This suggests opportunities for cross-marketing and itineraries that include a mix of activities.

• Many travelers for agritourism come from a short distance away, especially in the case of rural areas close to urban areas. These travelers are often day-trippers, coming for a singular experience such as a festival, a farm-to-table dinner or a roadside stand. For travelers from farther away, agritourism is typically one of many activities they enjoy on the same trip.

• The primary audiences for agritourism are families seeking fun and educational activities, seniors, and children’s groups. While visitors from across the U.S. and around the world are not uncommon, they usually don’t visit agritourism sites as their primary destination, but rather tend to find out about agritourism experiences while in the area and add them to their itineraries. (Agritourism: Cultivating Tourists on the Farm—WA State Extension) There are exceptions—for example, destination ranches—but in general, attracting visitors from far away requires connecting your agritourism experience with the array of other things visitors do in your region.

• In general, local people from nearby rural areas tend not to visit local agritourism sites except when hosting family or friends from out of town—if they consider your place a “must see” activity. Locals do participate in festivals or tours especially designed for them. Harvest festivals are popular. (Also from “Agritourism: Cultivating Tourists on the Farm”)

• Agritourism that integrates active outdoor recreation is more likely to occur in non-metropolitan rural areas with natural amenities and scenic landscapes. (Southwest Ontario Agritourism Development Strategy and Marketing Plan, 2011) Multi-day itineraries that link agritourism and outdoor recreation tend to be found in similar areas.

• Across tourism sectors, long extended vacations have been replaced by short intensively active vacations, with key markets two to three hours away from a given destination. (Agritourism and Nature Tourism in California, 2nd Edition 2011)

• California links nature tourism and agritourism development together, because the markets overlap and draw travelers to rural areas. Nature tourists tend to be affluent, and their numbers are growing. According to a 2006 study by the International Ecotourism Society, nature tourism grew by 20 to 30 percent annually starting in the early 1990s. Bird-watching is the fastest-growing segment of nature tourism; it is more popular than hiking, camping, fishing or hunting. (Agritourism and Nature Tourism in California)

• Canadian travelers participating in agritourism in 2007 were much more likely than other pleasure travelers to participate in wine, beer and food tasting, aboriginal cultural experiences and participatory historical activities. They also participated in outdoor activities, including wildlife viewing, ocean/lake activities, hiking, climbing and paddling. (Southwest Ontario Agritourism Strategy)

• Colorado links heritage, cultural and agritourism development together in an integrated plan. This is because nearly 75 percent of Colorado visitors include an agricultural, food or heritage activity on their trip. Of those, a third are traveling specifically for agritourism. There is also a strong connection to outdoor recreation, through a long tradition of farms and ranches hosting hunters. (Colorado Cultural, Heritage and Agritourism Strategic Plan, 2013)

• National Geographic has promoted the emergence of “Geo-tourism” to capture and promote traveler preferences for destinations that protect the authenticity and geographic character of their place. Agritourism is a good fit for geo-tourists, and Oregon’s Central Cascade region is already a featured geo-tourism destination in partnership with National Geographic.

• Oregon already has a strong brand for culinary tourism that is well-known internationally; culinary tourism overlaps with agritourism when the culinary activity takes place on a farm or ranch, or when it involves meeting the producer. Fifty-five percent of Oregon visitors participate in at least one culinary activity, according to the 2011 Oregon Bounty Visitor Behavior and Attitudes Related to Oregon Products report. The growth of wine trails and the wine industry here in Oregon and elsewhere is a harbinger for the potential of agritourism to benefit from interest in culinary tourism.
DEMOGRAPHIC TRENDS

Demographic trends indicate a mixed bag for agritourism.

• The market for agritourism and nature tourism industries serves primarily senior citizens and middle-age baby boomers. (Agritourism and Nature Tourism in California) This could create issues if interest in agritourism does not grow among younger generations.

• There is a trend toward grandparents traveling with grandchildren, which is an opportunity for agritourism.

• As noted above, most agritourists are day-trippers from urban areas, and they travel within a 40-mile radius at best. (USDA 2007 Agricultural Resource Management Survey, Farm-based Recreation Report) This is a sizable source of dependable customers for farm-direct sales near urban areas, even if these local customers do not “count” as tourists.

• While agritourism enthusiasts tend to be well-educated (33 percent have at least a bachelor’s degree, compared with 20 percent of the U.S. population), they have moderate income levels. This contrasts with similarly educated heritage, cultural and nature tourists, who are more affluent.

  • Oregon visitors tend to skew even more toward being highly educated: 47 percent of Oregon visitors surveyed in 2011 had at least a bachelor’s degree. (Oregon Bounty Visitor Behavior and Attitudes Related to Oregon Products, 2011)

  • While there is some overlap between outdoor recreation and agritourism activities, outdoor recreation enthusiasts are younger and tend not to travel with children.

  • Culinary tourists are also more affluent and younger than non-culinary tourists. (How to Get Started in Culinary Tourism, Massachusetts Dept. of Agricultural Resources) This is true by comparison to people who seek out general agritourism as well.

ECONOMIC IMPACT

The research related to spending associated with agritourism is scant, mostly old, and uses different methodologies. Because the activities are so broad-based—from stopping by a roadside stand for produce to embarking on a week-long farm-based culinary course—and because agritourism is often one of many visitor activities on a given trip, there is no typical spending amount. Below is select data that may be helpful.

• The most available data is on farm visits, primarily farm stands.

  • Tennessee, 2005 survey—The median expenditure per visitor was $15 (product and admission/user fee). It was much higher for wine tourists, where the average expenditure was over $25 per person. (Visitors to Tennessee Agritourism Attractions: Demographics, Preferences, Expenditures, Projected Economic Impact)

  • California, 2004-2005—61 percent of respondents (residents of Yolo and Sacramento counties in CA) spent between $5 and $40 on a farm; 16 percent spent more than $40.

  • Southwest Ontario, 2011—Typical visitors spent $16-$50 per visit.

  • The Oregon Bounty 2011 research revealed that half of all Oregon tourists bought local food products, and two-thirds bought such products to take home. They spent an average of $142 on such products. (Exploring Authentic Oregon: The Importance of Cultural Tourism, 2006)
Benefits and Challenges with Agritourism Enterprises

With agritourism, “Opportunity knocks at the doors of farmers and ranchers who have vision, skills and commitment. This opportunity unites tourists’ pursuit for of well-being and rural experiences with farmers’ and ranchers’ need to supplement their income. It provides operators an opportunity to diversify and protect themselves from fluctuating markets, and can allow landowners to benefit financially from wise use of their land.” (Holly George and Ellie Rilla, Agritourism and Nature Tourism in CA, 2011)

While agritourism began as a strategy for developing supplemental farm and ranch income, many operators today are as interested in sharing their passion for food production, land stewardship, rural lifestyles and authentic agricultural experience as they are in generating income. There are many other associated benefits you can realize, but also some challenges to consider. The table below lists some of these. The “Assessing Your Potential” section of the handbook will help you identify which benefits best fit your circumstances, as well as which challenges you’ll need to anticipate.

### BENEFITS OF AGRITOURISM

#### Increased and more diversified income
- Provides an opportunity to generate more income. This will probably not take the place of current agricultural crops, but it can add a new profit center to the current operation.
- Can be a small, part-time focus to supplement farm operations, or a main featured activity and income generator.
- Can extend the season for income generation beyond the normal farm/ranch cycle.
- Often, it is a means to add value to farm products through processing and direct marketing.
- Gives more opportunity to be a price-maker versus a price-taker; you can make higher profits from direct-to-consumer marketing of your products.
- Can help you capture the consumer’s food dollar as well as some of what they spend on entertainment and recreation each year.
- Builds future customers for your products; once they return home, they may order more product from you.
- Expands your market; beyond tourists, local people are a built-in market for farm- and ranch-based experiences and high-quality, locally grown food.

#### More value from existing assets
- Offers a way to increase revenue without increasing acreage.
- Provides an opportunity to build a new business with resources that already exist. It takes advantage of underused buildings, land and talent.
- Can build additional physical infrastructure that has value.

#### Strengthened opportunities for families
- Provides a way to include future generations on the farm or ranch and keep the land in the family.
- Creates new working opportunities for a spouse, children and family members that tap into varied talents.
- Maintains family interest in and attention to the farm.

#### Sharing of your way of life and promotion of the value of agriculture
- Gives you the chance to educate people about rural living, nature and the agriculture industry, which can lead to improved local policies.
- Can build bridges between farmers and consumers, and between rural and urban populations.
- Demonstrates and showcases how producers protect and care for the land and natural resources.
• Provides an opportunity to educate people about both historic and modern methods of farming, and the risks involved in everyday agriculture.
• Improves people’s understanding of local food systems.

Contribution to the economic vitality of your community
• Promotes farming in your community.
• Increases demand for locally grown farm products.
• Keeps youth and entrepreneurial activities in the local community.
• Addresses the shortage of lodging in rural areas (through farm and ranch stays).
• Presents an opportunity to organize itineraries related to agritourism and other experiences that together draw more visitors to your community.

A fun experience
• Allows you to meet visitors from all walks of life.
• Gives you creative expression.
• Is personally rewarding.

CHALLENGES OF AGRITOURISM

More work
• Provides low financial return, at least at first.
• Is hard work for you and family members.
• May require developing new skills.
• Requires more work to keep the farm clean, safe and presentable, which can sometimes detrimentally affect primary operations.
• Can create staffing issues and increase paperwork.
• It’s time-consuming and complicated to learn about and comply with a host of applicable laws and regulations.

More risk
• Involves regulations that vary dramatically from one county to the next, subject to local interpretation of state statutes.
• Presents more regulatory and liability risks.
• Often requires you to spend money upfront to improve facilities for visitors and meet regulatory requirements.
• Depends on travelers having discretionary income to spend, and thus is sensitive to economic downturns even though tourism is a growing sector.
• Potentially creates conflict with neighbors as business ramps up and traffic increases.
• Is not a familiar term for most travelers, and thus the market is not well-defined. There is a need for education to make visitors aware of agritourism experiences as a viable option.

Less down time
• Demands your full and constant attention, and can interfere with family time and activities.
• Requires that you are always “on” — upbeat and available.
• Involves a loss of privacy.

Not a panacea for a farm or ranch under stress
• Requires time and positive energy.

These lists were compiled from several sources, including: Agritourism and Nature Tourism in California, 2nd Edition – University of California Agriculture and Natural Resources; The New Agritourism – Barbara Berst Adams; Agritourism: Cultivating Tourists on the Farm – Washington State University Extension; Agritourism Master Plan for Clackamas County, Clackamas County Tourism Development Council; Creating Successful Agritourism Activities for your Farm – Community Involved in Sustaining Agriculture; Getting Started in Agritourism – Cornell Cooperative Extension; and Oklahoma Agritourism Resource Manual

Checklist: Types of Agritourism Activities

The following is a list of possible agritourism activities, to stimulate your thinking about what might best fit your skills, interests and facilities. Check the ones that interest you. Clearly, some are more complex undertakings than others; as you continue planning, be sure to analyze liability issues and the compatibility of your options with the character of your farm/ranch, as well as your values, goals and financial resources. You’ll refer back to this checklist as you proceed.

Also keep in mind that Oregon land-use codes and regulations can limit the frequency and types of certain agritourism activities, as well as the percentage of farm or ranch income derived from non-production uses on land zoned for exclusive farm use (EFU). See the “Policy and Regulations” section of the handbook for more specific guidance.

Direct sales of fresh or value-added products
- Roadside farm stand
- Farmers market
- Sale of handcrafted products
- Sale of value-added food products
- Sale of farm/ranch promotional items—shirts, aprons, mugs, etc.

Overnight accommodations
- Bed and breakfast
- Cabins
- Camping sites
- Farm stay/farm vacation
- “Glamping” in furnished yurts, fixed tents, etc.
- “Sleeping in the Straw” in a clean barn with fresh straw to cushion sleeping bags
- Full-service farm vacation with activities and meals

For-fee recreation
- Archery
- Bicycle trails and rentals
- Bird-watching
- Boating, canoeing, kayaking, tubing or rafting
- Fee fishing
- Fee hunting
- Game preserve or guided hunts
- Guiding and outfitting for recreation
- Hiking trails
- Horse stables
- Horseback trail riding
- Mountain biking
- Off-road vehicle driving area
- Pack trips
- Rock climbing
- Shooting range
- Swimming area
- Trap and skeet shooting
- Wilderness experiences
- Wildlife viewing
- Equipment rentals associated with these activities

Demonstrations and displays
- Animal husbandry
- Antique tools and equipment demonstrations
- Barn raising
- Beekeeping, homeopathy
- Bread-making, flour milling
- Cattle roundup and branding demonstration
- Cider pressing
- Conservation technology
- Demonstrations related to agricultural enterprise—sheep shearing, pruning, etc.
- Display gardens
- Food preparation—cheese-making, canning, etc.
- Harvest demonstrations
- Historic museum or display
- Traditional crafts: wool spinning, quilting, wreath-making, soap-making, weaving, etc.

Hands-on experiences
- Animal birthing
- Candle-making with local beeswax
- Caring for animals—helping with feeding, herding, etc.
- Children’s camps
- Classes in farming or ranch skills, including cooking, planting, harvesting
- Classes in recreational activities (fishing, hunting, wildlife viewing)
- Classes on crafts, especially traditional crafts
- Classes on medicinal herbs and honey-based homeopathy
- Crafting herbal remedies
- Cutting flowers, flower arranging
- Cutting own Christmas tree
- Educational camps for adults
Experience “a week in the life of” to learn and test a new occupation.
- Farm or ranch work experience
- Fly fishing or tying clinics
- Habitat improvement activities (e.g., native planting, tree planting)
- Hay-making — moving, raking, baling, stacking
- Hay rides
- Make your own toys
- Petting zoo
- Photography/painting classes
- Pony rides
- Pumpkin painting
- U-pick produce
- Weed identification, seed saving
- Wine, beer, cider or other tasting
- Working farm stay

Tours
- Alternative crop tours
- Elder hostels
- Foraging for wild mushrooms, berries, plants, flowers, rocks and gems
- Forest ecology
- Guided crop tours
- Habitat improvement projects
- Heritage buildings and heritage trails
- Production process tours for agriculture professionals
- Self-guided farm loops and specific farm product tours (e.g., honey trail, cheese trail)
- School tours or activities
- Vineyard, winery, brewery or cidery tour

Festivals and events
- Art shows
- Casual farm-to-table events (e.g., pancake breakfast)
- Craft fairs
- Crop art
- Gourmet farm-to-table events
- Historic or culturally themed festival (e.g., cowboy poets)
- Hunting, cattle, sheep dog training and competition
- Ice cream social
- Living history events
- Music events
- Outdoor plays
- Presentations on local community history, culture or customs
- Rodeo
- Seasonally themed festival (e.g., harvest, holiday)
- Specific crop- or product-themed festival
- Square dances or other similar events
- Stargazing parties

Pure entertainment
- Contests: apple bobbing, corn shucking, cherry-pit spitting, rooster crowing, etc.
- Corn or tall-grass maze and related seasonal activities
- Farm-themed playground
- Gourd golf, pumpkin bowling
- Haunted barn or house
- Outdoor games
- Storytelling

Facility rental and coordination
- Corporate or other retreats
- Family reunions
- Weddings

Other hospitality services
- Catering services
- Food trucks
- Picnic baskets for sale, picnic area
- Refreshment sales
- Shuttle service to nearby attractions

This list has been compiled from Oregon’s experience and several other agritourism development manuals, including: Agritourism and Nature Tourism in California, 2nd Edition – University of California Agriculture and Natural Resources; The New Agritourism – Barbara Berst Adams; Agritourism: Cultivating Tourists on the Farm – Washington State University Extension; Agritourism Master Plan for Clackamas County, Clackamas County Tourism Development Council; Creating Successful Agritourism Activities for your Farm – Community Involved in Sustaining Agriculture;
II. Assessing your Potential for Agritourism Success

Now that you have a sense of visitor interests, market trends and the range of possible activities, the next step is to assess how agritourism fits your skills and interests, your property, and the marketplace. When you’re done, you’ll have some specific ideas to research and develop. Later in Section V: Business Planning, you’ll find more guidance on how to test your idea, do a feasibility analysis and develop a business plan.

It’s essential to assess the likelihood of success for your agritourism venture. Instead of looking outside of your business, consider investing time in self-assessments to identify gaps and opportunities that may not have been considered. This intentional reflection can open doors by being intentional about how you proceed. Sometimes it’s easier to make decisions once you’ve set aside time to discern what works best for you, your business and your family. The following self-assessment process has five parts, some of which include consulting with family members, employees and possible partners.

SELF-ASSESSMENTS

• Is Agritourism a Fit for You and Your Family?
• Is Your Property Suitable for Agritourism?
• Do You Have Time?
• Is There a Customer Base for Your Idea?
• What Connections Are Important to Your Success?

GOAL-SETTING

• Setting Goals for Your Agritourism Enterprise

SUCCESS FACTORS

• Keys to Agritourism Success

Enjoy exploring what’s possible! Keep in mind that you have many choices about how to proceed. As you look at the possibilities, take heart from the following chart from Pennsylvania’s “Your Agritourism Business in Pennsylvania: A Resource Handbook” (2009) that shows some myths and realities related to agritourism activities. You’ll have to be patient!
<table>
<thead>
<tr>
<th>Myth</th>
<th>Reality</th>
</tr>
</thead>
<tbody>
<tr>
<td>Agritourism takes a lot of financial investment.</td>
<td>The number of assets you already have may surprise you.</td>
</tr>
<tr>
<td>Agritourism means you never get a break.</td>
<td>There are many activities from which to choose. You are your own boss and can choose when you want to operate the agritourism business.</td>
</tr>
<tr>
<td>Agritourism requires many big changes.</td>
<td>You can decide what works best for your location, so the need for changes will depend on your vision of the new business.</td>
</tr>
<tr>
<td>Agritourism requires a lot of experience to be successful.</td>
<td>The basics of agritourism success take good planning and management. This requires diligence and not necessarily a lot of experience.</td>
</tr>
<tr>
<td>Starting an agritourism business requires the hiring of new employees.</td>
<td>You can decide how large your operation is going to be. Many activities require only you.</td>
</tr>
<tr>
<td>Agritourism means that a large number of people will be on my land.</td>
<td>You can control your comfort level with visitors. You can be active in agritourism even with just one customer at a time.</td>
</tr>
<tr>
<td>Agritourists are annoying and will be a nuisance.</td>
<td>You can match agritourism activities to things that interest you. Good matching will mean that you are more likely to attract people to whom you can relate.</td>
</tr>
</tbody>
</table>

Assessment: Is Agritourism a Fit for You and Your Family?

Agritourism may provide additional income for your farm or ranch, but it’s not for the faint of heart, and it’s not for everyone. Take the time to assess whether this is really something that will enhance your life by first assessing your skills, personality and preferences according to the questions in the table below. Have your family members and, if applicable, key employees and partners answer the same questions, and then discuss your results together, using these three questions to focus your conversation.

• What conclusions do you draw from your personal and collective responses?

• Are there critical gaps in skills or attributes among the group? If so, can you tailor your business to work around those gaps? (For example, if privacy is a non-negotiable, perhaps your agritourism activity could take place off-site such as at a farmers market, or you could limit visitors to certain parts of your property that are away from your house.) Or could you enlist the help of someone who could fill the critical gaps?

• Looking back at the “Types of Agritourism Activities” checklist in Part I of the handbook, do any ideas stand out as particularly promising given what you’ve uncovered about your personal skills and interests?

This list has been compiled from Oregon’s experience and several other agritourism development manuals, including:  
- **Agritourism in Focus: A Guide for Tennessee Farmers**, University of Tennessee Extension;  
- **Agritourism and Nature Tourism in California, 2nd Edition** – University of California Agriculture and Natural Resources;  
- **Creating Successful Agritourism Activities for your Farm** – Community Involved in Sustaining Agriculture;  
- **Agri-tourism – Virginia Cooperative Extension**;  
- **Oklahoma Agritourism Resource Manual: Are you Ready to Host Visitors at Your Farm?** University of Vermont Tourism Research;  
- **Assessing your Farm for Agritourism**, VT Farms! Association and  
Assessment:
Is Your Property Suitable for Agritourism?

Your land and what’s on it are the foundation of your agritourism venture. You’ll want to systematically take stock of what you have, so that your agritourism activities can both draw visitors and co-exist with your primary agricultural activity. You’ll also need to pay careful attention to Oregon land-use law, state and local regulations, and risk management; see Sections III and IV of the handbook for more information.

This assessment will help you think about how you want to use your land — especially those features that don’t require much additional investment to be suitable for agritourism.

For example:

• Access to a roadside may enhance your ability to sell produce directly from the farm.
• Farms or ranches with wooded areas can be ideal for mushroom production, hunting or trails.
• Open areas might be good sites for fairs, festivals, plays, events and demonstrations.
• Fallow fields might provide hunting areas.
• Pastures could be used for alternative livestock.
• Scenic areas and outlooks lend themselves to outdoor recreation and other activities such as photography.
• Water can support hunting and water sports.
• Outbuildings can be converted to lodging and value-added product processing.
• Structures and sites with heritage can anchor guided tours and storytelling.

INSTRUCTIONS

This is another exercise that benefits from involving your family and, if applicable, your key employees. On the following pages you’ll find a blank assessment form for evaluating the agritourism potential of your property’s natural and physical assets. There is also a simple example of how you might fill it in. Here are the steps.

• Complete columns 1–3 based on what already exists on your property and how well it works for your current agricultural activities. You may want to draw a map showing the location of key assets, current activities and potential hazards.
  • For column 4, note if there is anything of historical, cultural, artistic or educational significance (for example, an old barn or orchard).
  • Next, keeping in mind your self-assessment as well as the checklist of potential agritourism activities in Section I, put some preliminary ideas in column 5 about what could work on your property. You may want to ask friends, family or potential partners to walk your property with you and get their “fresh eyes” on the possibilities.
  • Finally, use column 6 to note the pros and cons of your ideas. Will you need to invest in property improvements in order to implement the ideas?

If possible, visit with other agritourism businesses and learn from their experiences as you mull over the possibilities. Feel free to keep updating and modifying your ideas as you begin the business planning. Sections V and VI of the handbook offer more specifics on how to move forward with your new business enterprise.

</table>
Assessment: Do You Have Time?

Time is one of the major limitations for agritourism entrepreneurs. The following table will help you assess whether and when you’ll have time available to add the responsibilities of planning for and accommodating visitors on top of what you’re already doing. If you find that you’re stretched too thin, you don’t have to give up on your idea. You can strategize on how to fill the gap with other family members, partners or employees.

Instructions: List your current farm/ranch operations or tasks, and mark the “month” column for each month when the operation requires labor. Include all time spent in all aspects of the task, including preparation, implementation and follow-up activities. Then, following the same process, add proposed agritourism activities, with their labor and timing requirements. Now take a look: Do you have the time and labor resources to manage and operate your existing farm/ranch enterprise, take care of personal obligations, and conduct agritourism activities effectively?

Table from: Agritourism in Focus: A Guide for Tennessee Farmers, University of Tennessee Extension (used with permission), as adapted from A Primer for Selecting New Enterprises for Your Farm, University of Kentucky, 2000.
Assessment:
Is There a Customer Base for Your Idea?

Now that you’ve thought about your capacity and interests related to agritourism, it’s time to circle back and connect your ideas with concrete market trends... and your ideal customers! As you develop a business and marketing plan (Sections V and VI), you’ll create more specific action steps.

First, consider the information about market trends in Section I of the handbook. What are the key market trends that will affect your success? What types of customers are you most likely to attract, given these trends?

Next, consider the types of agritourism activities and experiences you’re potentially interested in developing—both in the short term and the long term. Of those options, which activities/experiences are the best fit with market trends in terms of delivering what customers are seeking? The “Why People Travel” information in Section I of the handbook is an additional resource to revisit for this question.

Now, what are the attributes of customers you’d like to have? And, just as important, what type of customer would you rather not have (rowdy parties, snobs, massive tour groups, etc.)?
Finally, imagine the profile of your ideal visitors. You may have more than one, so there are two identical charts below that you can use to profile different types of customers/visitors as needed. Make additional copies if you need more. Thinking about this now will help you with your marketing strategy later.

<table>
<thead>
<tr>
<th>Where is this customer from?</th>
</tr>
</thead>
<tbody>
<tr>
<td>Are they single or married? Do they have children?</td>
</tr>
<tr>
<td>What is their age?</td>
</tr>
<tr>
<td>What is their income?</td>
</tr>
<tr>
<td>In what type of group do they travel? Solo? Couple? With family? With friends? With a club or organization? As part of a small organized tour? A large organized tour?</td>
</tr>
<tr>
<td>What magazines, newspapers, books and internet media appeal to them?</td>
</tr>
<tr>
<td>What are their hobbies and interests?</td>
</tr>
<tr>
<td>How much time do they have for the activities you offer?</td>
</tr>
<tr>
<td>How much time do they spend in your community when they visit?</td>
</tr>
<tr>
<td>What types of experiences are they seeking? Demonstration and guidance? Relaxation? Entertainment? Action or physical activities? Other?</td>
</tr>
<tr>
<td>Other notes:</td>
</tr>
</tbody>
</table>

The ideal visitor profile chart is adapted from information in Agri-Business Council of Oregon’s Agritourism Workbook and Agritourism and Nature Tourism in California, 2nd Edition.

Setting Goals for Your Agritourism Enterprise

You may have had some sense of goals for your agritourism enterprise when you first started exploring potential ideas. This worksheet is a tool for articulating and aligning your agritourism enterprise with your deepest values and future aspirations. Ask your family and/or key partners to each work through this goal-setting process, and then compare notes to ensure you’re on the same page as you move forward.

PART I: WHAT DO YOU HOPE TO GAIN FROM YOUR AGRITOURISM ENTERPRISE?

Below is a list of some reasons you may have become interested in agritourism. How would you rank these business goals in terms of their importance for you? Ask your family and/or key partners to do the same, and then discuss your conclusions.

___ Diversifying farm and ranch income
___ Increasing farm and ranch income
___ Reducing debt and putting away money for the future
___ Modeling and teaching the public about responsible agricultural practices
___ Bringing variety to your work and meeting new people on a regular basis
___ Ensuring a place for the next generation to viably farm
___ Creating more diverse on-farm employment opportunities for family
___ Providing agriculture, business and customer service learning opportunities for family
___ Engaging local community members as friends of the farm or ranch
___ Strengthening connections to local community well-being
___ Partnering with other farms and ranches to attract visitors
___ Gaining more free time by developing a line of business that can easily be delegated
___ Creating a beautiful working landscape or environment
___ Other________________________________________
___ Other________________________________________

In the “Developing a Business Plan” section of the handbook, you’ll delve more deeply into setting business-specific goals and the associated financial planning. But first it’s important to examine if and how your business ideas align with your life goals, not just your business goals. After all, your hard work on an agritourism enterprise should bring your life goals closer to reality.

PART II: WHAT MATTERS MOST TO YOU IN TERMS OF A WELL-LIVED LIFE?

(Quadrant exercise used with permission from Pat Flynn, author of “Will It Fly? How to Test Your Next Business Idea So You Don’t Waste Time and Money,” 2016)

From your perspective, what are the four most important aspects for leading a satisfying life? When you look back on your life, what factors would you consider? For example, you might want a close-knit family, professional success, financial independence, early retirement, good health, positive impact on your community, improved health or beauty of your land, life-long learning, fame(!), etc.

1. ________________________________________________
2. ________________________________________________
3. ________________________________________________
4. ________________________________________________

Photo: Sionnie Lafollette
Now, on the chart below, label each quadrant with one of the four key aspects of your life. For each quadrant, imagine what your life will be like in five years if you’re progressing toward these goals. You don’t need to know HOW you will get there, just what’s possible if you apply yourself. Write the specifics down in the appropriate quadrant as if they are already true; the more specific you can be, the better.

<table>
<thead>
<tr>
<th>Quadrant 1</th>
<th>Quadrant 2</th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
<td></td>
</tr>
<tr>
<td></td>
<td></td>
</tr>
<tr>
<td></td>
<td></td>
</tr>
<tr>
<td></td>
<td></td>
</tr>
</tbody>
</table>
PART III: WILL THIS BUSINESS IMPROVE YOUR LIFE IN WAYS THAT MATTER?

Next, consider what you have described as your future life above. How does your top business idea reinforce or conflict with the future life you see for yourself and your family? If you have more than one potential idea, repeat the analysis for each idea.

<table>
<thead>
<tr>
<th>Agritourism Enterprise Idea:</th>
<th></th>
</tr>
</thead>
<tbody>
<tr>
<td>How could this enterprise reflect my values and help me achieve my life goals?</td>
<td>How might this enterprise potentially compromise my values or distract from my life goals?</td>
</tr>
</tbody>
</table>

PART IV: FIVE-YEAR GOALS

Finally (for now!), let’s tie everything together. For your agritourism enterprise and your life, how will you track your progress in the next five years?

<table>
<thead>
<tr>
<th></th>

Assessment: What Connections Are Important to Your Success?

By its very nature, successful agritourism depends on successful partnerships — because it crosses so many interests. It encompasses your family and employees; your neighbors and community leaders; your local and regional economic development and tourism advocates; a wide range of related businesses; planning and regulatory professionals and public lands managers; your elected officials; your banker and your insurance agent — and even your competition. There are many relationships to build and nurture! Begin thinking now about who to talk with, about what, and when. And then start talking, to seek input and build support for your venture. See Tips for Building Marketing and Community Partnerships in Section VI of the handbook for more advice.

Keys to Agritourism Success

“Agritourism activities are dramatically different than most traditional farming activities. Customers who visit you may want to participate in various activities, such as harvesting crops, hiking, hay rides, feeding animals and many others. These customers often do not come from a farming background, and will ask many questions about daily farm activities that many seem trivial.” (Assessing your Farm for Agritourism, Vermont Farms! Association, 2014.) You’ll have to be patient!

Agritourism is, above all, a people business that fosters genuine and beneficial connections between agricultural producers and visitors. As the Vermont document referenced above notes, “The ideal agritourism host requires many of the same personality traits that make a good host at any tourist attraction or any kind of service industry.” If you yourself don’t have the personality traits to make customers feel welcome, and their questions valued, you’ll want to have someone on your team (a family member or employee) who can play this role. Alternatively, you can choose an agritourism enterprise that doesn’t require you to interact with the public beyond your comfort level.

A BAKER’S DOZEN KEYS TO SUCCESS

- Choose something you love to do, as this will give you energy to persevere.
- Offer a high-quality product or service that delivers on what visitors are seeking: fun, education and/or relaxation.
- Start small and grow naturally.
- Be responsive to what customers want.
- Nurture a loyal customer base.
- Provide more than just a product — an experience.
- Don’t go it alone. Involve family members, partners and trusted advisors to tap different skills and talents. Look for opportunities to connect with your community.
- Track relevant trends affecting your business, and network with your peers.
- Create a realistic business plan for the future, but also stay open to exploring unanticipated opportunities that emerge as you move forward.
- Keep good records (production, financial, regulatory, marketing).
- Continually monitor and evaluate your business against your goals, and make adjustments as you learn.
- Secure adequate capitalization, either through your cash reserves or by creating a business that uses assets you already have without much additional investment.
- Don’t give up — ideas take a long time to become reality.

III. Complying with Legal and Regulatory Requirements

Now that you have some preliminary agritourism business ideas, you’re ready to navigate the maze of legal and regulatory permits required to operate. This section is designed to provide the information needed to successfully tackle this challenge without hitting too many obstacles.

In Oregon, the first and most complex factor to consider is statewide land-use law (including the provisions for agritourism); these laws drive what is permissible. While most agritourism land use regulations focus on preserving real working farms on land zoned “Exclusive Farm Use” (EFU), there are also land-use implications for forest and mixed-zoned acreage. As you may know from your current business operations, rules and regulations change often — thus, you’ll also find website links to the latest information from the relevant agencies in charge of administration and enforcement.

An additional complexity is that these laws are primarily implemented at the county level, and each county interprets the law in its own way. This means that, although we reference activities deemed legal and acceptable on farm land as defined by the Oregon Revised Statutes, your county may not have adopted these statutes into local code. In fact, the regulations vary dramatically from one county to the next. So you’ll want to investigate how your specific county treats agritourism ventures. The state statutes offer a useful framework and a common language for discussions with your local officials.

As you’re wading through this process, keep in mind that rules and regulations are generally written by lawyers; those of us without a legal degree can feel like we must speak a second language to figure out exactly what we need to do to comply. To save yourself time and more headaches, we highly recommend reading the regulations, making a list of questions, and contacting the licensing agency before you begin your application. An informal review meeting, or in some cases just a phone call, will make the application process much easier for you and the agency. By establishing that relationship early, you can cultivate an ally, an advocate and an expert to guide you not just in your start-up phase, but also as you discover new wrinkles or new ideas.

When you’re done with Section III, you’ll have more insight about the legal feasibility of your idea, as well as a timeline for addressing the legal and regulatory steps associated with your specific location and business activity. As you get your legal ducks in a row, you may want to look ahead to Section IV. It will help you identify, reduce and even eliminate other risks associated with your operation.

Guidance on Specific State Land-Use Regulations Affecting Agritourism

ERIKA POLMAR, OWNER, PLATE AND PITCHFORK

Chances are you've had success in life and business by adopting the motto “Better to ask for forgiveness than beg for permission” – after all, it’s a hallmark of creative thinkers, pioneers and business innovators! Unfortunately, when it comes to navigating the policies and regulations regarding agriculture, failing to ask for and obtain permission can put you and your customers in jeopardy.

BACKGROUND ON OREGON LAND-USE LAW

In response to competing interests and a desire to strengthen the state’s economy while simultaneously conserving farmland and natural resources, the Legislative Assembly passed the original Oregon Land Use Act in 1973. This act required all cities and counties to adopt comprehensive plans that met mandatory standards set by the state. These programs, and the semi-independent roles of the state and local jurisdictions, set the foundation for the land-use policies we encounter today.

For instance, even though the state Legislature adopted Senate Bill 960 in 2011, creating a process and structure for agritourism events, each of Oregon’s 36 counties has the option to respond by implement those parameters as they are written in statute, to implement a lesser version, or to implement nothing. It’s important to keep this in mind as you continue reading this section: Just because there’s a policy in place at the state level doesn’t mean it will directly translate to your location.

FIRST STEPS: PREPARING FOR PERMITS

As you embark on this venture, it's important to remember that you’re doing something new, and the very thought of agritourism can cause quite the Keruffle. Your neighbors may associate tourists with increased traffic and noise rather than with spending that bolsters the local economy. Planners and inspectors find themselves in the tough spot of meeting your needs and those of your neighbors, while ensuring the safety of the public. It's a tricky spot for everyone. As you proceed through the permitting process, patience and frequent communication will work to your benefit as you gain allies rather than make enemies.

So give yourself plenty of time to deal with the agencies regulating the industry. Agencies are often understaffed and can seem slow to process applications. Your business idea may be brilliant, but it may take time to build the regulator’s understanding of your proposed operation and goals. Sometimes rules and regulations can themselves be confusing: Keep in mind that regulations were written by lawyers, and it might take both you and the agency representative time to figure out what tools at their disposal can yield you the proper permits. You may need to appear before a board or committee whose agendas require a 30-day advance public notice. Given all these factors, arriving at your regulator’s or inspector’s office with only a few days to act tends to cause unnecessary conflicts and stress. Don’t be afraid to ask questions, but remember you catch more flies with honey than vinegar.

Finally, don’t be discouraged if your county hasn’t adopted a policy that you feel you need to operate your business. Oftentimes, a lack of resources or a lack of demand is the only reason a policy hasn’t been changed. You can once again put that pioneering spirit to good use by working with your planners and regulators to make some improvements!
COMMON REGULATIONS THAT IMPACT AGRITOURISM ACTIVITIES

Below you will find information about the most common regulations that impact agritourism in Exclusive Farm Use zones.

A. FARM USE

Farm use is regulated by ORS 215.203. This statute allows direct sales and marketing of farm crops.

Types of allowable uses
Uses may be subject to county review, and include:

• Direct sales and marketing
• U-Pick
• U-Cut
• Christmas tree sales
• Community-Supported Agriculture (CSAs), limited to crops grown/harvested on-site

Limitations and requirements
• Sales are limited to crops grown and harvested on-site.

B. MASS GATHERINGS

Mass gatherings are defined and regulated by ORS 433.735(1), ORS 433.750, ORS 433.755 and ORS 433.763(1). These statutes define “outdoor mass gatherings” to mean an anticipated assembly of more than 3,000 persons that continues, or can reasonably be expected to continue, for more than 24 consecutive hours but less than 120 total hours within any three-month period.

Other gatherings are defined as an assembly of 3,000 or fewer persons not anticipated to continue for more than 120 hours in any three-month period. Counties are allowed to make modifications to this definition (e.g., “large gatherings” in Marion County).

Types of allowable uses
• Concerts
• Festivals
• Fairs
• Carnivals

Limitations and requirements

Mass gatherings:
• Subject to review by the Planning Commission
• Demonstrate compatibility with existing land uses
• Not materially alter stability of land-use pattern of the area
• No permanent structures are allowed
• Have very detailed requirements for sanitary services, parking, medical services on-site, sewage, trash and food service

Small or “other” gatherings:
• Not subject to review (e.g., not a “land-use decision”)

Note: If you have an agritourism permit, you may not also apply for a mass gathering permit. If your county has adopted an Agritourism Policy based on SB960, you may not use “mass gathering” permits in lieu of an agritourism permit.
C. FARM STANDS

Farm stands are defined by ORS 215.283 (1)(o), and this statute defines farm stands as structures “designed and used for the sale of farm crops or livestock grown on the farm operation, or grown on the farm operation and other farm operations in the local agricultural area, including the sale of retail incidental items and fee-based activity to promote the sale of farm crops or livestock sold at the farm stand.”

Types of allowable uses

• Direct sales of farm crops and livestock produced on the farm or other farms in Oregon, and retail incidental items.
• Fee-based activity to promote the sale of crops could potentially include a variety of uses, but it’s worthy of note that these uses are based on a Court of Appeals case.
  • Small-scale gatherings such as a birthday or picnic
  • Corn mazes
  • School tours
  • Pumpkin patch events
  • Hayrides
  • Farm animal exhibits
  • Farm product food contests
  • Food preparation demonstrations
  • Outdoor farm-to-table dinners

Limitations and requirements

• This statute does not include temporary or permanent structures designed for occupancy as a residence, or for activity other than the sale of farm crops or livestock
• Nor does this statute provide for temporary or permanent structures designed for banquets, public gatherings and/or public entertainment
• Annual sales of incidental items and fees from promotional activities are limited to 25 percent of total annual farm-stand retail sales.

D. AGRITOURISM/COMMERCIAL EVENTS OR ACTIVITIES

This is the core of Senate Bill 960, approved by the Oregon Legislature in 2011 and referenced above. While agritourism events are defined by ORS 215.283(4), the statute doesn’t specifically define the term “agritourism.” The customary definition is any commercial enterprise at a working farm or ranch conducted for the enjoyment of visitors that generates supplemental income for the owner. To date, your county may have chosen to adopt these regulations in whole, in part or not at all.

What is consistent no matter where you are is that agritourism and other commercial events must be related to and supportive of agriculture. All the activities approved by these provisions must be “incidental and subordinate to existing farm use.” To define that phrase a little further, think of it this way: Is this event secondary to your on-site farming in terms of income generated, area occupied and off-site impacts? Does this event generate supplemental income that will support your farming efforts?

Types of allowable uses

The statute is not clear about the types of events and activities that might be allowed, so counties may interpret these uses differently. In general this permit could include activities related to:

• Education
• Hospitality
• Entertainment
• Outdoor recreation

More specifically, we see agritourism permits issued for:

• Cooking classes using farm products
• School tours (which could also be conducted with a farm stand permit)
• Farm/garden/nursery tours and stays
• Festivals and “Harvest Days”
• Pony rides, petting zoos, corn mazes
• Farm-to-table events
Limitations and requirements

State law requires that the activities and events must be related to and supportive of the agriculture, and be incidental and subordinate to existing farm use.

State law provides for a variety of permits; they increase in cost and intensity as the events do. They are:

• One expedited event permit
• One-event permit with a conditional land-use permit
• Up to six events with a conditional land-use permit
• Up to 18 events with a conditional land-use permit

Conditions associated with these permits are set by the local jurisdiction, but are likely to include:

• Parking
• Noise
• Sanitation
• Signage
• Food service

Although there is no specified limitation on annual agritourism event revenue in relation to overall farm income, these events are intended to be subordinate to existing use.

E. WINERIES

Wineries as related to land use and events are regulated by ORS 215.452 and ORS 215.453. A small winery is defined by statute as less than 50,000 gallons on at least 15 acres, or more than 50,000 gallons on at least 40 acres. A large winery is defined as at least 150,000 gallons on 80 acres or more. In general, wineries have a wider array of allowable activities. Certain activities are more restricted for wineries than for farms with permitted farm stands. However, there are also activities that are only permitted on EFU land occupied by wineries.

Types of allowable uses

Operations that are directly related to the sale or marketing of wine produced in conjunction with the winery are allowed. This includes limited-service restaurants and the sale of incidental items directly related to on-site wine sales, including:

• Wine tours and tastings
• Wine club meetings
• Winemaker luncheons and dinners
• Business activities for wine industry professionals
• Open houses to promote wine
• Bed-and-breakfast and room-and-board facilities

Agritourism or other commercial events in conjunction with wineries are also allowed. The promotion of wine produced in conjunction with the winery is a secondary purpose of the event. Such events include:

• Outdoor concerts for which admission is charged
• Educational, cultural, health or lifestyle events
• Facility rentals
• Celebratory gatherings
• Other events
• Charitable activities for which the winery does not charge a facility rental fee
Limitations and requirements

• Income from limited-service restaurants and sales of incidental items must not exceed 25 percent of income from wine sales.

• The size of the winery and frequency of events determines what permits are required. For small wineries that host events more than six days per year, and large wineries that host events more than 24 days per year, land-use permits are required.
  • Both 7-18 and over 25 day applications must address potential impacts, and must be subordinate to the production and sales of wine. And they may not create adverse impacts to uses on surrounding land.
  • Small wineries: a maximum of 18 days per year for events
    • 1-6 days is not a land-use decision
    • 7-18 days requires a land-use decision
  • Large wineries: maximum of 25 days per year for larger wineries
    • A land-use permit is required
    • Restaurants may operate 25+ days

F. GUEST RANCHES

Guest ranches as related to agritourism and events are regulated by ORS 215.296 (1)(2) and ORS 321.805. The guest ranch must be located on a lawfully established unit of land that is at least 160 acres, contains the dwelling of the individual conducting the livestock operation, and is not on high-value farmland.

Types of allowable uses:

• Lodging
• Hunting
• Fishing
• Hiking
• Biking
• Horseback riding
• Swimming

• Food service only for guests of the guest ranch, individuals accompanying the guests and individuals attending a special event at the guest ranch

Limitations and requirements

You may not establish a guest ranch if the proposed site of the guest ranch is within the boundaries of or surrounded by:

• A federally designated wilderness area or a wilderness study area;
• A federally designated wildlife refuge;
• A federally designated area of critical environmental concern; or
• An area established by an Act of Congress for the protection of scenic or ecological resources.

Additionally:

• A guest lodge must include not fewer than four and no more than 10 overnight guest lodging units.
• It may not exceed a total of 12,000 square feet in floor area, not counting the floor area of a lodge that is dedicated to kitchen area, rest rooms, storage or other shared or common indoor space.
• For every increment of 160 acres that the lawfully established unit of land on which the guest ranch is located exceeds the minimum 160-acre requirement, up to five additional overnight guest lodging units not exceeding a total of 6,000 square feet of floor area may be included in the guest ranch, for a total of not more than 25 guest lodging units and 30,000 square feet of floor area.
• Recreation may not include the development of golf courses.
• The cost of meals, if any, may be included in the fee to visit or stay at the guest ranch. A guest ranch may not sell individual meals to an individual who is not a guest of the guest ranch, an individual accompanying a guest or an individual attending a special event at the guest ranch.
A-Z Glossary of Common Land Use Terms

Accessory Structure: A building or structure subordinate to the property’s primary use.

Administrative Decision: A discretionary decision on a land-use permit, made by city or county staff without a hearing.

Applicant: The person who fills out an application for a permit to develop or divide land (see “Property Owner”).

Building Official: The official who administers the building code and issues building permits.

Building Permit: Approval from the local building official to build, alter or place structures on real property.

Comprehensive Plan: A document adopted by the local government that provides the long-range land-use planning goals and policies of a city or county. The plan is composed of text and a map.

Conditional Use: A use that may be allowed, if it meets prescribed conditions in the Zoning Ordinance or additional conditions set forth by the decision-making body.

Complete Application: An application is deemed complete when all the information necessary to process it is provided to the planning official.

Decision-Making Body: The body that has the legal authority to make decisions on requests for development permits and adopt or amend land-use ordinances (i.e., planning commission or city council).

Easement: A right to use, for a specified purpose, a particular piece of land owned by another.

Evidentiary Hearing: A hearing in which evidence may be presented.

Findings: A statement of the standards, facts and conclusions used in making a decision.

Floodplain: Low areas adjacent to rivers, lakes, estuaries and oceans that are periodically flooded at intervals of varying frequency.

Height Requirements: The maximum distance, from the ground to the highest part of the structure, that is allowed by a Zoning Ordinance.

Land-Use Application: A form on which a person requests a land-use action.

Land-Use Action: A final decision or determination made by a decision-making body affecting land use.

LCDC: Land Conservation and Development Commission. A seven-person volunteer commission appointed by the Governor to develop and administer Oregon’s statewide planning goals.

LUBA: Land Use Board of Appeals. An independent, three-person board appointed by the Governor to hear and rule on appeals of land-use decisions made by local governments and special districts. LUBA is the only forum that can hear appeals of local land-use decisions.

Legislative Decision: Decisions that create general rules or policies. A legislative matter affects an entire jurisdiction or a broad area, and a wide range of property owners. Making a Legislative Decision is generally optional.

Ministerial Decision: A non-discretionary decision on a proposed use of land, often made by staff. An example is a building permit for a structure that is an outright permitted use in the zone (see “Outright Permitted Use”).

Nonconforming Use: A land use not permitted by current zoning regulations. The term is frequently used to describe a use or structure that was legally established but is no longer permitted. An example may be a house constructed prior to zoning regulations in an area that is now designated industrial.
Nuisance: That which substantially interferes with the enjoyment and use of one’s land.

Off-Street Parking: An area on private property designated for parking motor vehicles.

Oregon Revised Statutes: The laws passed by the Oregon Legislature (also referred to as “ORS” and “statutes”).

Outright Permitted Use: A use permitted by a zoning ordinance that does not require consideration of discretionary approval criteria, special by a planning official.

Partition: Either an act of partitioning land, or an area or tract of land that is partitioned. “Partition land” means to divide land into two or three parcels within a calendar year.

Planning Commission: A group of lay persons appointed by the governing body of a city or county to advise the governing body in matters pertaining to land use and comprehensive planning.

Pre-Hearing Contact: Contact between a decision-maker and an applicant or citizen on a matter that is to be heard by the decision-making body.

Periodic Review: A formal process by which the local government’s land-use planning documents are reviewed to address changing circumstances and ensure compliance with new laws and rules.

Public Notice: Information about a land-use decision or a hearing to be held regarding such a decision. Such notice is published in a newspaper, mailed to property owners of adjacent property, or both.

Quasi-Judicial: The application of existing regulations to specific properties. The local government is generally required to make a decision on a quasi-judicial matter.

Residential: Structures intended for or used as living quarters for human beings (single-family dwellings, apartments, manufactured homes, etc.).

Setback: The placement of a building a specified distance away from a property line, other structure or other feature.

Sign Ordinance: An ordinance that regulates the size, shape, color and elimination of signs.

Site Plan: A map showing the land and buildings involved in an application for a development permit.

Statewide Planning Goals: The state of Oregon adopted 19 planning goals, 14 of which are applicable to every jurisdiction in the state. The remaining five goals cover the Willamette Greenway (Goal 15) and the coastal area (Goals 16-19).

Structural Plan: A plan describing how a building will be constructed.

Subdivision: Either an act of subdividing land, or an area or tract of land that is subdivided. “Subdivide land” means to divide land into four or more lots within a calendar year.

Subdivision Ordinance: An ordinance specifying the standards to be used in or Land Division Ordinance developing sewers, streets, water lines and other infrastructure, and establishing procedures for approving development actions.

Subsurface Facilities: Those facilities installed beneath the earth’s surface, such as septic tanks and electrical, sewer and water lines.

Urban Growth Boundary (UGB): An imaginary line around cities separating urban from rural land. Upon establishment, an urban growth boundary (UGB) contains sufficient land to accommodate 20 years of growth for residential, commercial, industrial and public uses.

Variance: A decision to lessen or otherwise modify the requirements of a land-use ordinance as it applies to a particular piece of property.

Zoning Ordinance: An implementation tool of the comprehensive plan or Zoning Code. It identifies specific land-use zones and provides the regulations affecting uses within each zone. It includes the processes to administer various types of land-use actions. Sometimes it is combined with the regulations for dividing land.

Zoning Map: A map that shows parcel-specific zoning districts.
Using BLM Land for Events

Any individual or group conducting commercial activities and business on federally or state-managed lands must obtain a special use permit from the agency managing the land on which the business is being proposed. For agritourism, Bureau of Land Management (BLM) lands are the most common public lands in question.

Furthermore, anyone charging a fee to lead, guide or assist an outdoor recreational activity on public lands must also be registered with the Marine Board (503-378-8587, 435 Commercial Street, Salem OR 97310) as an outfitter/guide. Both the BLM and Forest Service require proof of a guide registration before issuing a permit.

To gauge if you need a permit for your agritourism operations, consider these questions.

- Will your event involve public lands?
- Will you be rafting a river that requires a permit?
- Will you be traveling in a designated wilderness?
- Will you advertise?
- Will you charge a fee?
- Do you expect to make a profit on the event, or is the fee purely to cover expenses?
- Will there be a competition?
- Will you mark a course for an activity?
- Will you be expecting vehicles at your event? (How many?)
- Is anyone being paid to organize, lead or participate in your activity?

If you answered “yes” to any of these questions, you need a permit from the BLM.

For all uses requiring a Special Recreation Permit, you must apply to your local BLM office at least 180 days prior to your event. Contact your local BLM office directly for more information.

Why is a permit needed?

The permit process is intended to identify any potential land-use or resource conflicts that may arise; identify applicable procedures, permits and special conditions needed to protect resources and public uses; achieve a common understanding between the agency and the applicant about the objectives of the activities; and identify time frames, limitations and responsibilities. In addition, fees generated by the commercial use of lands managed by the federal government are returned to the Treasury as revenue.

Types of permits

Commercial Use

“Commercial Use” is defined as recreational use of public land and related waters for business or financial gain. When any person, group or organization makes or attempts to make a profit, receive money, amortize equipment or obtain goods or services as compensation from participants in recreational activities occurring on public land, the use is considered commercial.

Examples: Outfitters and guides, jeep tours, horse-trail and wagon-train rides, cattle drives, educational tours or uses and photography associated with a recreational activity.
Competitive Use

“Competitive Use” means any organized, sanctioned or structured use, event or activity on public land in which two or more contestants compete and either: 1) participants register, enter or complete an application for the event; or 2) a predetermined course or area is designated.

Examples: OHV races, horse-endurance rides, mountain-bike races, rodeos.

Special-Area Use

Special Areas are areas officially designated by statute (law) or Secretarial Order.

Examples: Camping in Oregon and Washington, floating many BLM-managed rivers, backpacking in primitive areas, hiking in wilderness areas in Oregon and Washington.

Organized-Group Activity

Organized-Group/Activity permits are for noncommercial and noncompetitive group activities and recreation events.

Examples: A large scout campout, a fraternity activity, a large family reunion, an educational tour or use, or a dual-sport event.

Vending

Vendor permits are temporary, short-term, nonexclusive, revocable authorizations to sell goods or services on public land, in conjunction with a recreation activity.

Examples: T-shirt sales in conjunction with a raft race, a hot-dog stand at a motocross event, firewood sales in a BLM campground, and shuttle services.

To obtain a permit, complete the form found here: http://www.blm.gov/or/resources/recreation/files/BLM2930.pdf.
Use the instructions found here: http://www.blm.gov/or/resources/recreation/apply_ins.php.
IV. Managing Risk

Agritourism can help your farm or ranch reduce its operating risks, by diversifying your income sources and your customer base. But risk can’t be totally avoided in life, no matter what you do. Agritourism provides no exception.

There are certainly, however, steps you can take to minimize risk and protect yourself and your farm and ranch if things go wrong despite your best efforts. And it’s easier than ever before in Oregon to find that sweet spot between excellent, safe visitor experiences and viable business operations. That’s because Oregon has joined most other U.S. states in developing limited liability protection statutes specifically for agritourism, about which you’ll find detailed information below. When you complete your risk assessment and management plan, you should have a good sense of what agritourism activities are appropriate for you from a risk standpoint, and the risk management costs you need to account for in your business plan.

Overview and Oregon liability laws related to agritourism

- Reducing Risk by Managing Liability; 2012 Oregon Agritourism Summit presentation
- Oregon Equine Inherent Risk Law (OR 360.687 to 360.697) passed in 1993; it establishes special liability protections for agritourism activities associated with horses.
- Oregon Agritourism Inherent Risk Law (OR SB341) passed in 2015; it extends liability protections for all Oregon agritourism activities as defined by statute.

Assessing risk

- Checklist for Assessing the Risk of your Agritourism Enterprise
- Strategies to Avoid, Reduce, Transfer and Adapt to Agritourism Business Risks
- Top 10 Ways to Limit Your Liability When Visitors Come to Your Farm, Kerr Center for Sustainable Agriculture, Poteau, OK
- Managing Agritourism Risk and Business Structure Considerations; Oregon attorney Tim Bernasek, Dunn Carney law firm.
- Risk Management Plan Template

Managing risk

- Risk issues can be quite different from one agritourism operation to another, depending on size and specific focus. A small family farm with no outside employees, for example, will have very different issues than a large commercial operation with value-added processing and events in the mix. As a result, risk management takes many different forms, depending on the appropriate level of detail required. This toolkit aims for a middle ground as a starting point. However, if these tools don’t fit your circumstances, More Useful Tools from Other States contain links to many other planning resources.

Reducing Risk by Managing Liability

Excerpted from a presentation at the 2012 Oregon Agritourism Summit by Lance Adams, PayneWest Insurance, Baker City, OR, along with Keith Barnhart, Willow Springs Guest Ranch, Lakeview OR.

From Introduction by Melissa Fery, Oregon Small Farms Program

Why risk management matters, in the words of farmers and ranchers with agritourism operations

- Visitors are coming out for an experience; we want those experiences to be good ones.
- We want visitors to have fun and be safe.
- We want our employees to be happy (and not have to spend their time chasing people away from where they shouldn't be!).
- We don't want to be sued; we want to get paid.
- We need to know the details of our policies — what we are protected against and how we can protect ourselves.
- We must actively manage risk through such things as fencing off areas we don't want people to explore, and hiring extra help for busy times.
- In farming and ranching, we often learn by doing, but in the case of managing risk, preparation is really important!

1. RISK IS EVERYWHERE:

There is risk of something unexpected and potentially harmful associated with all activities. Risk can be high or low, but as panelist Keith Barnhart of Willow Springs Ranch noted, “Every time someone comes on your ranch, it’s a risk. We just need to accept that as a given.” Risk cannot be eliminated, but it can be managed.

- While it’s safe to assume that you already have liability policies for your farming and ranching operations, the minute you invite someone onto your property and charge a fee, this negates the liability protections in your general policy unless the fee-based operations have been included specifically.
- Thus, you need to consider additional insurance, specific to your planned agritourism activities, that specifically protects you for risk associated with those activities. In the case of Willow Springs Ranch, an outfitters liability policy covers their agritourism activities, while their general liability policy covers their ranching operations.

2. RISK COMES IN MANY FORMS:

There are several classes of risk to consider in order to protect your assets. For some, you have more control than for others.

- Economic — Changes in the market that affect your operations.
- Legal — What compliance/statutory liability laws affect your activities?
- Political — Laws and policies change over time.
- Social — This includes the need for public/neighbor relations, the potential loss of reputation, and social directions that could irritate neighbors.
- Physical property and people on your property — This is a major focus of this presentation, and there are many specifics to consider. For example, if people are staying on your farm or ranch and they venture off your property, you may still be liable for anything that happens to them over the period of time that they are your guests. Ask your insurance agent about how this applies in your case.
- Judicial — Judge/jury decisions can cause changes in public attitudes.
3. MANAGING RISK
INCLUDES SEVERAL STEPS:

Risk management is the process of protecting your assets by analyzing and planning for risks associated with your operation.

- Identify the specific risk exposures for planned activities at your place. In other words, imagine all the ways people can find to injure themselves; you need a good imagination! Keep in mind that adults are usually a greater challenge than children, who tend to obey rules, at least those not set by their parents! (See sample checklists elsewhere in this section of the handbook.)

- Analyze the degree of risk associated with specific activities. Are there situations that could cause serious injuries? These are especially critical to address.

- Develop strategies for controlling exposure to risk. For example, can you put something away, fence it off, add a sign, provide advance information, etc.?

  - Keep in mind that you want to balance being hospitable and avoiding risk. For example, if you go to extremes and tack up “don’t” signs everywhere, this may detract from the “we’re glad you’re here” experience you want to give your guests.

- Determine how to finance losses associated with risk. Through sound risk management strategies alone, you can reduce but not entirely eliminate risk. In purchasing liability insurance, you transfer the risk costs to your insurance company in exchange for your premium payments; your deductibles represent what you directly assume as your share of the risk beyond what the carrier pays.

- This only works well if your insurance agent fully knows what your operations entail. Otherwise, you may have issues when/if you need to make a claim.

- If you have vendors providing agritourism services on your property, you can have them add you as an Additional Insured on their liability insurance for their operations (e.g., someone holding an event or a farm dinner).

- Having waivers and releases signed by your customers with “hold harmless” language can also alleviate your risk-exposure issues if you aren’t negligent, but such waivers don’t keep you from being sued! Most insurance policies do provide for legal defense.

- However, you cannot transfer the risk costs associated with your negligence. Thus, you need to consistently implement and monitor your risk management activities: Have clear policies and procedures in place, and be sure you consistently apply them. Willow Springs Ranch sends its release form to customers as part of a welcome package of information that people can review before sending their payment. The form has a check box to acknowledge that the information has been read and understood. It’s best to send that information in advance for activities that have some real risk (e.g., horseback riding is more risky than you-pick strawberries), or else you could be accused of “unfair inducement,” which means giving folks no option but to sign after they’ve already paid for an experience.

- If you need to make a claim, it should not preclude you from securing insurance in the future, but it may increase your rate, depending on the size of the claim, the state of your industry, whether you informed the insurance company of all your activities in advance, and whether you were actually negligent.

- Remember that even if you have done everything “by the book” to ensure your visitors’ safety, it will still stick with you if someone gets hurt on your property. So try your best to anticipate and address as much as you can with risk management, and ensure that you are never negligent.
4. TIPS FOR FINDING A GOOD INSURANCE AGENT:

• The questions here should give you a good vocabulary for interviewing agents. If your prospective agent isn’t asking you these questions, he or she doesn’t have the expertise to insure a farm, ranch or agritourism operation.

• Ask others with similar operations about whom they use.

• Check with your state insurance commission regarding reputation and complaints against your prospective insurance agent.

• Trust your intuition to tell you if it’s a good fit.

5. OTHER RESOURCES:

• See Video of Entire Presentation from the 2012 Oregon Agritourism Summit here.

• Text of the Oregon Equine Inherent Risk Law (1993), which offers specific liability protections for agritourism activities associated with horses.

• Text of the Oregon Agritourism Inherent Risk Law, passed in 2015 after this presentation was made. This expands liability protections for all Oregon agritourism activities as defined by statute.

The information included in the Oregon Agritourism Handbook should not be construed or treated as legal advice or counsel on matters of legal, tax, land-use or other policy. The Oregon Agritourism Handbook is strictly written to provide information to individuals interested in pursuing an agritourism business. This information is intended as a guide and resource hub. It is the responsibility of the individual to determine and understand all applicable laws, rules and regulations for each specific business and location. This handbook only offers information on where and how to connect with those resources. In no way is the information compiled intended to replace advice obtained from professionals such as an attorney, insurance agent, financial planner or land-use planner. Content and outside links found in the Oregon Agritourism Handbook do not necessarily reflect the views of Travel Oregon, Oregon Tourism Commission, or the State of Oregon. While the writers of this content have taken precautions to ensure the accuracy of the information provided, please note that content is subject to change. The advice of qualified and licensed professionals should be sought before embarking on any new or expanded business venture.

Assessing Risks for Your Agritourism Enterprise

Agritourism can be a risk-management strategy for your farm or ranch as a whole, because it diversifies your income streams, creates new marketing channels, and possibly evens out your seasonal cash flow. Agritourism is not without risk itself, however. The risks associated with agritourism, or any business operation, fall into eight major categories:

<table>
<thead>
<tr>
<th>Category</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>Physical safety of your site</td>
<td>Safety of products for sale, including food safety, compliance with direct-sales regulations, etc.</td>
</tr>
<tr>
<td>Safety of products for sale, including food safety, compliance with direct-sales regulations, etc.</td>
<td>Compliance with environmental and land-use regulations</td>
</tr>
<tr>
<td>Compliance with environmental and land-use regulations</td>
<td>Compliance with other applicable laws and general business regulations, including employee safety and welfare, as well as animal safety and welfare</td>
</tr>
<tr>
<td>Compliance with other applicable laws and general business regulations</td>
<td>Market changes</td>
</tr>
<tr>
<td>as well as animal safety and welfare</td>
<td>Business interruption due to natural disasters or weather</td>
</tr>
<tr>
<td></td>
<td>Legal and management structure</td>
</tr>
<tr>
<td></td>
<td>Financial solvency</td>
</tr>
</tbody>
</table>

This risk assessment will primarily focus on the first two categories of risk. Section III of the handbook focuses on the two “Legal Compliance” risk factors in more detail. And Section V of the handbook, Developing your Business Plan, focuses on planning for the last four factors. The Risk Management Plan in this section of the handbook includes space to include strategies for all eight risk factors.

**INSTRUCTIONS**

Take a walk around your farm or ranch (or drive, depending on the size!) as if you were a visitor. If possible, bring along a friend who may be able to observe with fresh, less familiar eyes. Make a list of potential hazards, and specify the location (Worksheet 1); take pictures as needed to help you remember and/or to convince a partner not walking with you that certain things are problematic. And stretch your imagination, as people can find the darnedest ways to hurt themselves!

Next, use Worksheet 2a to assess the specific risks associated with agritourism activities. List the specific agritourism activities you’re considering and where they will take place (Column 1). List the associated risks that visitors could encounter from the moment they arrive on your farm or ranch (Column 2).

Then assess the importance of the risk to your operation, along two dimensions: the likelihood of injury and the magnitude of potential loss (Columns 3 and 4). Finally, identify ideas to avoid, reduce, accept or transfer risk (Column 5), and guesstimate the cost of implementing these risk management strategies (Column 6).

Finally, complete the related Worksheets 2b and 2c as per their slightly different column headings.

Now you’re ready to develop a Risk Management Plan.

This list has been compiled from Oregon’s experience and several other agritourism development manuals, including: Agritourism in Focus: A Guide for Tennessee Farmers, University of Tennessee Extension; Agritourism and Nature Tourism in California, 2nd Edition; University of California Agriculture and Natural Resources; Creating Successful Agritourism Activities for your Farm; Community Involvement in Sustaining Agriculture; and Vermont Agritourism Collaborative: Agritourism Best Practices: Safety and Risk Management. Worksheets 2a, 2b and 2c are directly adapted from Tennessee’s Agritourism in Focus, with permission.

* For example, issues with neighbors, market changes, etc. Keep these in mind as you move forward into business planning.
Strategies to Avoid, Reduce, Transfer and Adapt to Agritourism Business Risks

AVOID RISK:
• Just say no to the activity with unacceptable risk! Tap your other ideas instead.

REDUCE RISK:
• Be familiar with laws and regulations and follow all requirements.
• Develop and implement safety measures and procedures for customers and employees. Post rules.
• Define visitor areas, visitor activities and visitor supervision procedures.
• Keep visitor areas clean and free of hazards.
• Provide visitors a map and post property boundaries.
• Provide sanitary restrooms.
• Make hand-washing facilities available for employees and customers.
• Flag unsafe areas on your property, and create signage that directs people away from risky places.
• Safely store pesticides, herbicides and other toxins.
• Post and lock “do not enter” areas.
• Keep implements and machinery away from visitors.
• Develop and implement an emergency response plan.
• Block off bodies of water.
• Guard against fire.
• Develop and implement safe food-handling procedures.
• Ensure your products are labeled correctly.
• Orient and train employees in proper operational procedures.
• Keep your animals vaccinated and healthy.
• Get first aid training and require the same of employees.
• Retain an on-site first aid kit, fire extinguishers and a weather radio.
• Place lists of emergency phone numbers with directions to your operation at all phones.
• Provide adequate parking that eliminates roadside hazards.
• Develop and implement an accident reporting system to preserve contact information for injured parties and witnesses, as well as photos and other relevant information.
• Seek assistance from professionals such as lawyers, accountants, production specialists and others as needed.
ADAPT TO RISK:

- Set up a beneficial legal structure for your agritourism operations that limits associated risks.
- Have a strong business plan.
- Have a strong management team and structure for monitoring risk on an ongoing basis.
- Create an emergency fund to pay for insurance deductibles and unplanned expenses.

TRANSFER RISK:

- Obtain property insurance.
- Obtain liability insurance that fits the specific activities you are planning.
- Obtain health and disability insurance.
- Obtain crop insurance.
- Ensure you are protected for off-farm or ranch liability: “sponsored activities that cause off-farm harm, hazard or injury.”
- Learn and follow insurance requirements and claim procedures.
- Require customers to sign lease or rental agreements for appropriate activities (such as fee hunting or equipment rental).
- Require vendors and independent contractors to maintain current licenses and insurance while operating on your property; and when they are earning money from other customers while on your property, have them add you to their liability policy as an Additional Insured.
- Require customers to sign hold harmless agreements or liability waivers.

Adapted with permission from Agritourism in Focus, University of Tennessee Extension Service; Agritourism and Nature Tourism in CA, 2nd Edition.
Managing Agritourism Risk and Business Structure Considerations

So you want to expand your agricultural operation to include a more direct connection to the public. It can be very exciting to think of the ways you can enhance your operation and at the same time provide the public with an educational and rewarding experience out at the farm. However, whether you are considering adding a pumpkin patch, corn maze, “farm-to-fork” dinners, or any other type of agritourism business, there are a number of things to consider.

Whenever an agribusiness expands to include direct encounters with the public there are a number of risks that must be taken into account. Visitors could be injured. Your property could be damaged. Crops could be contaminated. Your service may not meet up to expectations. Any of these things could add up to legal liabilities that need to be managed. Here are a few things to consider to help manage these risks:

**Waiver/Release:** Any time you have visitors accessing your operation, you should have a well-crafted liability waiver and release. In addition to informing visitors of any inherent risk they may encounter as a result of being on a working agricultural operation, such waiver and release can limit your liability. You should also consider how to make your operation as safe as possible which might require a change to existing operational policies and procedures.

**Insurance:** Before beginning any agritourism activities, you should have a good discussion with your insurance agent to make sure you are properly insured. Make sure your agent fully understands what you intend to do and discuss any associated risks. It is far better to understand what your policy covers (and what it doesn’t cover) before an accident happens than to learn afterwards that you have a gap in coverage.

**Business Structure:** Another way to manage this risk is to consider creating a new legal entity within which all agritourism activities are undertaken. Should an accident happen, having a separate entity that is different from your agricultural operation can limit exposure to your overall business.

If you do not take steps to create a formal legal structure for a new business, the default structure is a sole proprietorship. Obviously, this is the simplest form of legal structure, but it does not provide any kind of liability protection to shield assets should an accident or other unfortunate incident occur as a result of your agritourism activities.

One of the most popular forms of entities to limit risk is a limited liability company (LLC). An LLC can be fairly simple to create and have a great deal of flexibility to meet your operation’s needs. You can choose different taxation methods (pass through taxation to LLC member’s personal taxes or corporate taxation where the entity is taxed). It is important to keep LLC assets and accounts separate from other assets and accounts when running an LLC.
Another option to limit risk is to incorporate. Incorporating your business was the traditional method of business organization for managing risk before LLC’s became popular. While still useful in certain circumstances, corporations require more legal formalities (issuance of stock, regular recordkeeping, and regular meetings of directors/shareholders) than other forms of entities. Some business in Oregon choose to become B corporations where instead of simply considering benefits to shareholders, the impact to the public are taken into account as well.

Whatever the business structure you choose, you should still make sure you have proper insurance and use waivers/releases if you choose to create a new business structure, but having separate entities can be an important way to effectively manage overall risk.

Without a doubt there are a lot of things to consider with agritourism. We live in a time when urban populations seek out rural experiences and are willing to pay for it. This demand creates great opportunities in agritourism. Just be sure to consider the risks and have a conversation with your lawyer, accountant and insurance agent to make sure you are as prepared as possible to protect and grow your operation.

Written by Tim Bernasek, partner at Dunn Carney LLP, a leading business and agricultural law firm in the Northwest. Tim is the leader of Dunn Carney’s Ag, Food and Natural Resources Team and advises agricultural businesses of all sizes in business, real estate, and employment issues.

Risk Management Plan for Your Agritourism Enterprise

Now that you have assessed the risks associated with your proposed agritourism activities, you can develop a plan to address these risks. Your choices include:

• Avoid the risks of certain activities by deciding not to implement them.
• Reduce the risks of activities by proactively anticipating and managing them better.
• Transfer the risks of activities by acquiring appropriate liability insurance, and/or secure waivers from your customers.
• Accept or absorb the risks of activities by establishing an appropriate business structure and reserves.

Your risk management plan will likely include elements of several of these strategies.

Instructions

List here the agritourism activities you’re interested in pursuing, given your risk assessment. In other words, these are the activities for which avoidance is not your preferred strategy. Keep these in mind as you develop your Risk Management Plan.

Read the other articles in the “Risk Management” section for inspiration, and then complete as much of the following worksheet as you can. The gray shaded rows may be easier to come back to after you have developed your Business and Marketing Plans in the handbook sections that follow.

Questions for your Insurance Agent

General
• Do you understand what I propose to do?
• Where do you see the risks? (This will help you see how well the agent understands.)

Existing policies
• What exactly does my general farm liability insurance already cover? Where are the gaps? (Think about those yourself ahead of time, so you can probe with specifics.)
  • Am I covered for sales made off the farm or ranch (e.g., farmers markets)? To what extent?
  • Are farm employees covered for anything they may do in association with the agritourism operation?
  • Does my automobile coverage on farm vehicles cover agritourism-related travel? If not, what type of policy do I need?
• Any other questions (based on your operation).
• What are the specific reasons, if any, that indicate I need to supplement my general farm liability policy with a more specialized commercial business policy?

Agritourism-specific insurance
• To what extent would this proposed policy cover:
  • My premises and operations liability?
  • My product and operations liability?
  • My contractual obligations to others?
  • My personal liability to or injury to others (e.g., slander, invasion of privacy)?
  • My advertising liability to others? My property liability to others?
  • My incidental medical malpractice resulting from my helping an injured person?
  • Non-owned watercraft liability?
• Host liquor liability?
• Court cost for defense?
• Are there any specific exclusions?
• What size umbrella policy will provide adequate coverage, and what coverage levels would you recommend for each type of liability coverage? Why?
• Is my policy a “claims and occurrences” policy? And what happens if I change insurers?
• What are my options, including options for deductibles?
• How is the company you’re recommending rated? Based on what?

Risk management
• Will guests have to sign anything special to be covered, such as a waiver?
• Should groups using my farm or ranch for an event be required to show evidence of insurance? When should I ask to be an Additional Insured?
• Should my contractors (e.g., outfitters, caterers) be required to show evidence of insurance? When should I ask to be an Additional Insured?
• What types of documentation should I keep to protect myself from negligence claims?

This information was adapted from several sources, including: Creating Successful Agritourism Activities for your Farm; Community Involved in Sustaining Agriculture; Agritourism in Focus: A Guide for Tennessee Farmers, University of Tennessee Extension; and Taking the First Step: Farm and Ranch Alternative Enterprises and Agritourism Resource Evaluation Guide, Southern Maryland Resource Conservation and Development Board.
Questions for your Insurance Agent

General

• Do you understand what I propose to do?
• Where do you see the risks? (This will help you see how well the agent understands.)

Existing policies

• What exactly does my general farm liability insurance already cover? Where are the gaps? (Think about those yourself ahead of time, so you can probe with specifics.)
  • Am I covered for sales made off the farm or ranch (e.g., farmers markets)? To what extent?
  • Are farm employees covered for anything they may do in association with the agritourism operation?
  • Does my automobile coverage on farm vehicles cover agritourism-related travel? If not, what type of policy do I need?
• Any other questions (based on your operation).
• What are the specific reasons, if any, that indicate I need to supplement my general farm liability policy with a more specialized commercial business policy?

Agritourism-specific insurance

• To what extent would this proposed policy cover:
  • My premises and operations liability?
  • My product and operations liability?
  • My contractual obligations to others?
  • My personal liability to or injury to others (e.g., slander, invasion of privacy)?

V. Developing a Business Plan

Sure, you have an agritourism idea for your business, but do you have a business plan? And do you need a written plan? It depends. The format for your business plan can vary greatly. If you’re seeking outside financing, you will likely need a formal, comprehensive business plan, for which there are many guides. If you’re establishing a partnership or other legal structure, you’ll want a written plan to spell out agreements regarding business goals, operations, and key roles and responsibilities. Even if you’re investing only your own money, you may sleep better with a written plan! Without such a plan, your business can grow so fast and unfocused that it takes over your life, or it can stagnate as a cash drain that detracts from your most important life goals.

If you’re not writing a business plan for an outside audience, you can certainly keep it focused and brief. It should include the following.

**Basic Contents of a Business Plan for Agritourism**

- **Executive Summary** (one page)
- **Family Goals**
- **Mission Statement** — Your venture’s core purpose
- **Business Overview** — The operation type, size, facilities, location
- **Industry Profile** — Trends, competition
- **Market Potential and Marketing Plan** (see Section VII for more on Marketing Plans)
- **Operation and Management Plan** — Key roles and responsibilities, qualifications of management
- **Financial Statements** — How the operation will be financed, including pro-formas (projections of revenue and expenses with break-even analysis)

**General resources for business planning and management**

- **Growing Farms: Successful Whole Farms Management** — OSU Small Farms Program
- **Online Tool for Building Your Business Plan** — Small Business Association
- **Agriculture Business Planning Workbook** — Colorado State University Extension
- **Oregon Start a Business Guide** — Oregon Secretary of State (English, Spanish)
- **Small Business Resource Guide** — Oregon/Washington edition from Small Business Administration
- **State of Oregon Business Resources**

**Financing your agritourism operation**

- **InvestOR Ready Accelerator** — Raises funds for start-ups and growth through Community Public Offerings. **(Application)**
- **Creative Financing for Agricultural Businesses** — From Columbia Gorge-based farmer and author Rebecca Thistlethwaite
- **Business Oregon Business Programs**

**Testing the water with small experiments**

Of course, your written business plan is not written on stone. When you see promising opportunities, you may want to consider how you can test your new ideas simply and cheaply—following the trend of retail “pop-up” temporary shops and food carts. For example, could a small event, open house or tour provide a useful testing ground? You can even plan to experiment as part of your business plan! Treo Ranches in Heppner provides a great example of business evolution from a traditional ranch to a fee-based hunting lodge, to bike tourism, and now to pheasant pie production. **Video**
Developing an Agritourism Business Plan

If you’re considering a new agritourism venture, you may feel both a rush of excitement and terror! While agritourism ventures are rewarding, they are also financially challenging. And while the benefits to starting or growing these businesses go beyond the purely financial, you don’t want to be surprised by financial losses. So before writing an extensive plan, start with a “back-of-the-envelope” financial viability assessment. Can your concept pencil out? Even better, can it make money?

First, estimate the up-front expenses associated with starting or expanding this business. What renovations, machinery, and investments will you need to make to get this idea up and running? Do those seem reasonable to you? Next, estimate your product/service price, and the rough cost of delivering each unit of that product or service. Would your price cover your costs of providing the product or service, as well as repay you for the upfront investments above over a reasonable time period? Don’t worry yet about fluctuations in your sales because of seasonality, product offerings, varying profitability of products/services: this is meant to give you a rough frame of reference.

Now, do you want to proceed? Once you have honed a general concept that can be profitable, then start organizing your ideas and assumptions in the form of a business plan. If your idea is legal and inexpensive, you can simultaneously proceed to beta-testing: a small scale, time-limited test period of operation to gain experience and market intelligence.

Especially if you’re seeking outside funding like a bank loan, a written business plan is essential. If you’re not seeking outside financing, then you won’t need to create quite as formal of a document. However, planning in a thorough way, even if just for your own reference, will give you positive momentum and benchmarks to track your progress toward long-term goals. This isn’t busy work – this is a living document that helps you think through and remember the details to be successful.

I. DRAFTING YOUR BUSINESS PLAN

While many generic business planning templates can be used for your agritourism venture, there are specific planning issues for farms/ranches and farm-based businesses that you’ll want to address. The Oregon “Start a Business Guide” and other resources in this section of the Handbook provide detail on all the following topics.

Here are the basic five categories of a business plan:

A. Statement of Purpose (your business’ mission statement).
B. Business — description, structure, location, and services/products
C. Marketing — price, promotion, place and product
D. Operating your business — who will do what?
E. Financial Documents — financial needs, cash flow, income projection, breakeven point projections, balance sheet

If you’re looking for assistance drafting this document, consider contacting the local Small Business Development Center — there’s likely an office near you.
A. Statement of Purpose

Crafting your Mission Statement: A mission statement is a concise description of your business goals. It’s a great way to clarify and communicate your goals and philosophies. It reflects your goals, what your product offers, business strategy, target market, and more. Try brainstorming on paper first—don’t worry about having it come out perfect. Once you get your ideas on paper, condense the language down to a statement you can read in less than thirty seconds. For an extensive look at mission statement development for businesses, check out these examples from Rutgers and Purdue.

Beyond what you would present to others for financing, you should include a statement about your personal/family goals that relate to the business. See the “Setting Goals for your Agritourism Enterprise” worksheet in Section II of the Handbook for guidance if needed.

B. Business Structure and Information

Choosing your business structure wisely, and building your understanding of applicable laws and regulations—these are the foundation for business success. Your business plan explains your choices and the underlying rationale.

1. First, if you are starting or expanding a service on a farm, ranch or vineyard, reach out to your county planning department before you formalize anything. County staff can advise on applicable regulations, fees and timing issues. Be sure to start this relationship early—don’t be caught off-guard later by regulations and permits you hadn’t anticipated.

2. Review the Oregon requirements for starting a business including business license requirements.

3. Determine the right business structure for your venture—it’s important to pick the right one to protect your personal assets and your family. In your business plan, you will describe the structure you selected and why. See below getting an attorney’s input.

4. Register your business here. First, select a name that will resonate with your audience and state what you do clearly. Next, Oregon’s Business Registry Database to see if your name is already taken: if so, you’ll need to come up with something different. While a business name is important, try not to get stuck moving forward. Finally, the specific steps you’ll need to take to register your business depend on the business structure you choose. For example, as a sole-proprietor, it would be necessary to file with an additional “Doing Business As” application whereas if you file as an LLC, your name is registered in Oregon automatically.

5. Apply for your free Employer Identification Number through the IRS (if applicable). You may need this to file your taxes, pay employees, and to open a business bank account.

6. Connect with the 3 A’s—accountant, agent, and attorney: If you don’t have such advisors yet, consider developing relationships before you think you need them. They have knowledge that can save you thousands in the long run from taxes to lawsuits.

a. An accountant can help you build a straightforward accounting system or help maintain and process your records. This matters because having poorly managed finances is a quick way to take your new venture down! An accountant can help with building financial projections and flag key responsibilities around filing and paying taxes.
b. An insurance agent can help protect you and your assets from risk — and agritourism operators face unique quirks in coverage. Even if you have insurance already, don’t assume that a new activity is covered by your existing policy. The “Risk Assessment” section of the Handbook includes “Questions for your insurance agent” that you can use to evaluate prospective insurance agents.

c. An attorney can help you choose the right structure and address issues from a risk and liability perspective. A good attorney can also help you interpret the laws and regulations affecting small business owners. Be sure to ask other agritourism operators for recommendations.

7. Products and Services: What are you offering? What is the distinguishing characteristic(s)?

C. Marketing your Business

If you’ve been focused on cultivating a farm, ranch or vineyard, marketing may not have received the kind of focus it will need for an agritourism venture. Marketing has multiple facets:

1. Defining your customer’s needs and interests and how they match up with what you offer, as well as your proposed pricing.
2. Identifying potential competition for your target customer, as well as complementary businesses with whom you might collaborate for mutual benefit.
3. Designing your story and the message you’ll share.
4. Creating accessible electronic landing spots for your market like a website or social media platform(s)
5. Creating and sharing the word about your business locally through special promotions, advertisements, open houses, or presentations
6. Highlighting how you will connect with your local marketing, business and tourism entities such as your local chamber, regional tourism association and/or Travel Oregon

D. Operating your Business

It may be that you are a one-person business, and you will do everything needed to operate the business by yourself. In this case, your operating plan is simple, as long as you possess all the skills needed to move forward. But many businesses do not fit this mold: they are family businesses, or legal partnerships, or sole proprietors who critically depend on contractors. This is the part of the business plan where you articulate your operating plan, to ensure that you have all the bases covered with appropriately skilled and available people.

E. Creating Financial Documents

Especially for agricultural businesses, finding funding can be challenging. You will need a solid, vetted business plan to be a candidate for outside funding. Very few grants exist for start-up funding — there are some competitions where you can pitch your concept for some initial seed funding but those avenues tend to focus on high-growth and technology focused niches. There are several options for raising start-up funds including microloans, small business loan, and general loan programs offered from your banks to the Small Business Administration. Review this resource on Creative Financing for Agricultural Businesses from author Rebecca Thistlethwaite.
II. REFINING YOUR BUSINESS PLAN:

Once you are done, create a one-page summary of your business plan and post it where you can see it often! But also keep in mind that a business plan is never completely finished: you will likely make adjustments as you learn and as market conditions change. Continually take advantage of opportunities to test your ideas and gain feedback along the way.

A. Activate your networks

Most people want to help — all you have to do is ask. Reach out to your family, friends and connections. They can review your plan, give feedback and connect you to others. You never know who could actively support your endeavor — whether that’s through beneficial social or business connections, financial support, lending hand or a kind word of support. Not only can your network support your venture— they can promote your business in their circles. Don’t forget to also communicate with your neighbors if the venture could impact them at all.

B. Beta-test your concept

Try out your idea on a small trial group by offering them the service or product; have them give feedback and input that can improve before you formally launch this new product or service. Expect to make a round or two of changes in your business plan after these trials.

C. Connect with successful operators

It can also be helpful to travel to other similar businesses around the state: advice from existing successful operators is invaluable! Join the (free!) Oregon Agritourism Network, which meets three times annually around the state: this learning and networking venue can connect you with other like-minded operators who are passionate about agritourism.

D. Collaborate locally

Collaboration can generate cost savings, improved profits, and efficiencies in marketing and customer acquisition.

Reach out to other local businesses to explore how to tie your product or experience with theirs. Incorporate these joint activities into your plan. For example, if you have a ranch bed and breakfast, you could create guest packages with other niche experiences like a restaurant or outdoor recreation tour. By mobilizing collective resources, you can reach and bring in a wider audience that supports each of the businesses in the area.
VI. Marketing Your Agritourism Venture

Marketing is simple: Determine the most likely customers for your product or service; communicate what you offer in terms of what your customers value; deliver what you promise and delight your customers, who will recommend you to others; price your offerings for a profit; and do it all with a smile! No wonder it can feel intimidating! But you can tackle it step by step.

The marketing strategy ties into your general business plan (see business planning resources in Section V insert hyperlink to Section V landing page here); it should be consistent with your overall business values, goals and budget. But the marketing plan is different because it focuses on detailed tactics. Below are some Oregon resources, as well as selected tools from other states that are particularly useful.

Market data

- Part I of this handbook, “Why Consider Agritourism?” contains information about market preferences and trends for agritourism.

Marketing resources and advice from Travel Oregon

- An overview of Travel Oregon’s marketing resources for tourism entrepreneurs, as well as general marketing tips.

Developing a marketing strategy

- Marketing Strategies for Agritourism Operations — Holly George and Ellie Rilla, University of California at Davis, Agriculture and Natural Resources

Other marketing tools

- Agritourism Signage: A Study of Best Practices — MARStewart Group
- Social media for agritourism: The best way to convey effective social media is by example. Below are examples of effective web-based communications from agritourism businesses and agritourism business partners based in Oregon. These examples showcase three types of online platforms: websites, Facebook pages and blogs. The website is your general reference resource for customers, like a paper guide that doesn’t change often; Facebook is your newsletter where you announce upcoming events and show what happened; the blog is a window on your world, more broadly than your business alone. All these tools help you connect, and stay connected, with your customers.

  - Leaping Lamp Farm Stay, Alsea: Website and Facebook page
  - Plate and Pitchfork, Portland: Website
  - Camas Country Mill, Junction City: Website for schoolhouse project
  - Dragonfly Farm and Nursery, Langlois: Facebook page
  - Winding Waters Adventures, which partners with local ranches, Joseph: Blog
Here is a simple three-part template to help you think about and capture the essential ingredients of your marketing strategy.

### PART 1:

**BIG PICTURE** focuses on defining the unique features and benefits of your product and service, and how you will position it in the marketplace* given your target audience. The key variables that determine market position are what marketing professionals call the “Four P’s”: product (or service), place, price and promotion. The concept has evolved more recently to the “Four C’s”, which reflect the same four categories from the point of view of your customers: customer benefit, convenience, customer cost and (two-way) communication.

Examples of Marketing Mediums.

<table>
<thead>
<tr>
<th>Product/Customer Benefit</th>
<th>Place/Convenience</th>
<th>Price/Customer Cost</th>
<th>Promotion/Communication</th>
</tr>
</thead>
<tbody>
<tr>
<td>• What does your target customer want?</td>
<td></td>
<td></td>
<td></td>
</tr>
<tr>
<td>• What features must your product or service offer to meet these needs?</td>
<td></td>
<td></td>
<td></td>
</tr>
<tr>
<td>• How is it differentiated from your competitors — quality? Style? Beauty? Personality? Service packages?</td>
<td></td>
<td></td>
<td></td>
</tr>
<tr>
<td>• Where do buyers look for your product or service?</td>
<td></td>
<td></td>
<td></td>
</tr>
<tr>
<td>• Is it easy to find? If not, is that a disadvantage?</td>
<td></td>
<td></td>
<td></td>
</tr>
<tr>
<td>• Frequency of service/availability?</td>
<td></td>
<td></td>
<td></td>
</tr>
<tr>
<td>• Timing?</td>
<td></td>
<td></td>
<td></td>
</tr>
<tr>
<td>• Visibility?</td>
<td></td>
<td></td>
<td></td>
</tr>
</tbody>
</table>

<table>
<thead>
<tr>
<th>Price/Customer Cost</th>
<th>Promotion/Communication</th>
</tr>
</thead>
<tbody>
<tr>
<td>• What’s the value of the product or service to the customer?</td>
<td></td>
</tr>
<tr>
<td>• Are there established prices?</td>
<td></td>
</tr>
<tr>
<td>• How will your prices compare with your competitors?</td>
<td></td>
</tr>
<tr>
<td>• Will your price be considered fair?</td>
<td></td>
</tr>
<tr>
<td>• Will you offer volume discounts?</td>
<td></td>
</tr>
<tr>
<td>• Where and when can you get your message across to the people you are targeting as customers?</td>
<td></td>
</tr>
<tr>
<td>• What “mediums” will you use to communicate? (Keep in mind that advertising is the most expensive medium!)</td>
<td></td>
</tr>
<tr>
<td>• How will you engage with your customers?</td>
<td></td>
</tr>
</tbody>
</table>

* Note that your competition is not just other farm stays, farm stands, ranch vacations, etc. Try to think broadly about what choices your customers have for their leisure time: to stay home and relax, to visit exotic places, to make their own jam, to hike in a forest, etc.
PART 2:

**TACTICS** focuses on the specific types of promotion and public relations you will undertake to connect with your customers. The “medium” is the method for delivering your message to your potential customers, as well as the method for two-way communication with your customers.

<table>
<thead>
<tr>
<th>Examples of Marketing Mediums</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>Website</td>
<td>Add a Blog to your site</td>
</tr>
<tr>
<td>Posters around town</td>
<td>Better signage</td>
</tr>
<tr>
<td>Hand out flyers at events</td>
<td>Hold own events</td>
</tr>
<tr>
<td>Product demonstrations, trainings, presentations</td>
<td>Monthly e-newsletter to customers</td>
</tr>
<tr>
<td>Distribute brochures/business cards</td>
<td>Sales, discounts, contests</td>
</tr>
<tr>
<td>Cultivate relationship with media, pitch stories and make yourself available for interviews</td>
<td>Distribute cute take-homes (e.g., bookmarks with recipes) at point of sale</td>
</tr>
<tr>
<td>(“earned” media)</td>
<td></td>
</tr>
<tr>
<td>Cross-promote or package with other related businesses</td>
<td>Direct mail to prospective customers</td>
</tr>
<tr>
<td>Cultivate word-of-mouth network</td>
<td>Promote to clubs and associations</td>
</tr>
<tr>
<td>Go to trade shows</td>
<td>Create videos</td>
</tr>
<tr>
<td>Join appropriate marketing associations, from the local chamber to the Cheese Guild, depending on what fits</td>
<td>Encourage past customers to recommend on platforms such as TripAdvisor, etc.</td>
</tr>
<tr>
<td>Social media — Facebook, Instagram, Twitter...</td>
<td>Buy cooperative advertising</td>
</tr>
<tr>
<td>What fits you best?</td>
<td></td>
</tr>
<tr>
<td>Travel Oregon marketing platforms</td>
<td>Regional Destination Marketing org platforms</td>
</tr>
</tbody>
</table>

VII. Delivering a Great Visitor Experience

A great visitor experience not only satisfies the soul – in an era of lightning-fast communication via social media, happy visitors can be extremely valuable ambassadors for your products and services. They can also become friends! This section of the handbook contains resources for great customer service, as well as guides to creating specific types of agritourism experiences.

Exceptional customer service

- **Oregon Guest Service Training Program** is a partnership between the Oregon Restaurant and Lodging Association Education Foundation and Travel Oregon. Through the program, you and your employees or family members can participate in an accredited and internationally recognized customer service training program, starting at a cost of $30/person. Learn more from the OGSTP Fact Sheet.
- **Visitor Readiness Considerations**, a presentation from the John Day River Territory Agritourism Workshops, from Janet Dodson of Sunnyslope Marketing LLC.

High-quality experiences

- **Offering High Quality On-farm Experiences**, Vermont Agritourism Collaborative. Explains how to build authenticity, safe environments and facilities, educational experiences (both farmer-led and self-guided) and strong customer service.
- Specific activity guides from several states. Some regulatory information is specific to the state, but the content on how to deliver memorable experiences is broadly applicable.

- **Farm Stays**
  - [How to Develop a Farm Stay](#), Vermont Agritourism Collaborative
  - [Farm Stay U.S.](#), the national association for farm stays, based in Oregon
  - [Farm Stay Manual](#), Minnesota Institute for Sustainable Agriculture
  - [Farm Stay Business Guide](#), Farm Stay U.S.
  - [What to Expect During a Farm Stay](#) (a customer perspective), Farm Stay U.S.

- **On-Farm Sales**
  - [How to Develop a Farm Stand](#), Vermont Agritourism Collaborative
  - [How to Develop a Pick-Your-Own Business](#), Vermont Agritourism Collaborative

- **Events**
  - [How to Host Dinners on Your Farm](#), Vermont Agritourism Collaborative
  - [How to Develop Farm-to-Table Dinners](#), Oregon Farm Loops, Mary Stewart

- **Educational Experiences**
  - [How to Host Summer Camps on Your Farm](#), Vermont Agritourism Collaborative
  - [Activities for School-Age Children](#), Vermont Feed
  - [How to Develop a Farm Tour](#), Vermont Agritourism Collaborative

Section VIII of the handbook provides additional examples of high-quality experiences created through win-win partnerships.
How to Develop Successful Farm-to-Table Dinners

Mary Stewart, Oregon Farm Loop, farmloop@gmail.com
June 2014 (revised January 2017)

Methodology
Information for this study was gathered from websites that presented information about Farm-to-Table programs in Oregon in 2014, as well as an interview with Pascal Chureau of Field & Vine Events and lessons learned by the author.

What is a Farm-to-Table Dinner?
Farm-to-Table Dinners (Farm Dinners) are a type of culinary tourism held on a farm. According to experts, the tourism product blends the elegance of a gourmet fine-dining meal and service with the rustic setting of a working farm, garnished with the real-life personalities of great chefs, farmers and winemakers. You can also add the element of surprise. The activity has been gaining momentum and achieving success over the past decade.

The cuisine is a mix of fresh Northwest and French country-style dinners, which are popular with followers of the Slow Food movement. Farm Dinners include the opportunity for the visiting public to come to a working farm and savor a sit-down, three- to six-course meal with wines, ciders or beers paired to each course. Some dinners offer a food-only option at a lower price. The dinners are set in a field, orchard or vineyard. The tables are tastefully set with linen, china, candles and flowers, and the menus include several courses of appetizers, entrées, sides and dessert.

The enticing menus are created from fresh, local foods that are sourced from nearby farms and wineries as much as possible. The varietal choices change depending on what is in season. The chefs seem to enjoy the challenge of taking what is available and preparing a feast that is both delicious and unusual.

Does your county have potential to develop and operate successful Farm Dinners?
A county with a strong agriculture economy and a location close to an urban population center has the best potential for attracting and operating Farm Dinners.

For example, Clackamas County, Oregon, has all the right “raw ingredients” for successful Farm Dinners: close proximity to the state’s largest population center; a top ranking in farm product sales; a strong interest in locally grown and well-prepared food; hundreds of farms that have scenic locations ideal for dinners; multiple sources of a variety of top-quality local food, beers and wines; talented caterers and chefs; and motivated farmers.

If your farm is zoned as Exclusive Farm Use (EFU) land, a farm dinner may be an acceptable use according to state land use however, it’s best to consult with your county planning department before planning your event as additional permits may be required.

Chef and farm selection
Chefs/caterers who have the greatest success in presenting Farm Dinners are those who have a reputation for excellence and a loyal customer base; have an established restaurant or catering business with an experienced staff; and have or can easily rent tables, chairs, linens, tableware, grills, tents or shade umbrellas. A Farm Dinner is not an easy event to present, so the chef/caterer needs to be ready to cope with weather, dust, insects, loss of power, sound systems and other challenges and surprises that may come up in the course of setting up and operating the event. Another challenge is the inexperience of many farmers in preparing for and presenting events, including where and
how to park cars and buses. It is helpful to have a farm coordinator who understands events and can coach farms in how to prepare for these types of events. Menus should include ingredients and wines sourced from the host farm, as well as farms in close proximity.

Farms with the greatest potential for success are well-managed and attractive, with enough flat ground for the event area; a well-kept road; a parking area or field for 50 to 60 cars; restrooms or VIP porta-potties; a commodity that guests can order during the dinner and pay for and pick up after the dinner, or a gift shop; and covered areas for temporary shelter in inclement weather. As they plan, host farms should consider both comfort and safety issues.

**Marketing and sales**

The program for a typical Farm Dinner includes a welcome, one or more farmers and winemakers talking about their farm and/or their product, and a tour of the farm land. If the dinner also benefits a charitable organization, that organization will discuss its purpose and merit. Some Farm Dinners include live music, but amplified music may be prohibited: check the latest regulations. During the meal, order forms are distributed and diners have the opportunity to place an order for the farm’s product. Those order forms are collected, and the diner picks up and pays for the filled order at the end of the evening. Some farms may sell food, others wine, and some may sell non-food products such as nursery stock and alpaca yarn.

Farm Dinners in Oregon are marketed under several event names, including *Field to Table*, *Plate & Pitchfork*, *Dinner in the Field*, *Field & Vine Events*, *Dinner on the Farm*. While the event names are different, they are all similar in format and all add up to an enchanting dining experience.

Promotion of a Farm Dinner event is done through social media, including blogs, earned media in newspapers and magazines, websites and word of mouth. Both the farms and the caterers promote the events to their clientele groups. In 2015, pricing of the events varied from $85 per person to $200 per person. Often, the guests are celebrating a special date or time in their life, such as a birthday or anniversary.

Typically, the chef/caterer or the organization benefiting from the dinner hosts the website for the Farm Dinner(s) they will present. The website includes a compelling visual style that draws the reader into learning more and, hopefully, buying a ticket. The website includes information about the chef, a list of the dinner dates and times, locations, menus, and a link to purchase tickets and receive a confirmation of the purchase and directions to the event. The website is linked to partner websites and Facebook pages, such as farm loop and local tourism partner websites. Facebook pages provide the opportunity for the chef and farms to document the experience, and for patrons to share their farm dinner experience with others.

**Sourcing local food and beverage product**

Farm Dinner patrons enjoy and expect foods and beverages sourced from the host and nearby farms and wineries. When creating the menu, the chef/caterer should first consider what foods are grown on the host farm and other farms within the region, then take the time to procure the food. One of the challenges is obtaining local food that is consistent in quality and meets the expectations of the chef/caterer. Another obstacle can be the timely delivery of the food to the chef for inspection and preparation. Sources of food to consider include the host and nearby farms, farm loop farms, farmers markets, and farm and winery organizations that advertise farm-direct food and beverages.

**Farm Dinners benefit both the visiting public and the farmer**

Farm Dinners reconnect people to their local sources of food, wines and other farm products, while bringing a new revenue source to the farmer through product sales.

Farm Dinners have proved to be an effective way to market farm products. While the guests are on the farm, they build a relationship with the farmer and the land. They purchase the farm’s product that night and as a repeat customer after the event, because they like the product and/or they want to support the farmer, whom they now know. These consumer-direct sales are very profitable for the farmer.
Ticket sales are usually handled by a reservation service, such as Eventbrite, but sometimes the chef will take reservations through his/her restaurant reservation line.

The local tourism Destination Marketing Organization (DMO) and event Regional Destination Marketing Organization (RDMO) should be informed of the Farm Dinner plans. An example of a DMO is the Clackamas County Tourism and Cultural Affairs Department. These organizations have powerful marketing tools and expertise, a voice with the media, and a keen understanding of the visitor who may be interested in participating in a Farm Dinner.

A customer list may be built by gathering names and addresses of guests who attend Farm Dinners. Use the customer list to keep these loyal followers informed about future Farm Dinners and related farm activities. Report ZIP code trends to the local DMO to help them have an understanding of the customer base for agritourism.

**Licenses and permits**

The meal must be prepared and served by a licensed caterer or restaurant chef, and staff must have food handlers cards and OLCC servers permits. The meals are prepared in a commercial kitchen and brought to the farm for finishing and plating, or some courses are cooked at the farm. A temporary restaurant permit and temporary alcohol sales permit may be required. Farmers who wish to personally prepare and serve food (in quantities larger than a sample – 2 oz) and alcohol must utilize a licensed kitchen for food preparation and will need to obtain additional permits and liability insurance that covers food & alcohol service.

Counties differ: the farm should make sure they have the necessary permits by checking with their local planning and health departments.

**Pair the dinner with other activities**

Recreation was paired with a Farm Dinner when Farm to Fork teamed with Momentum River Expeditions to produce a four-day river expedition down the Wild and Scenic portions of the Rogue River to offer gourmet cuisine along the way. Some 21 guests floated by day and consumed artisan meals by night, including wine pairings with each course and discussions with farmers and winemakers around the campfire. In Benton County, a farm-to-farm bike ride culminated in a Farm Dinner.

**Preparing the farm to host**

Host farms need to offer a setting that is clean, scenic and pastoral, with level ground. Farms need to carry adequate liability insurance and be prepared to respond to emergencies, from slips and trips to allergies and heart attacks. Restrooms or high-quality and recently cleaned porta-potties and hand-washing stations are imperative. It is best if farms own a large tent, folding chairs and tables, but these items may also be rented. A portable speaker system will help amplify the voices of the chef, farmer and other speakers giving presentations.

Adequate parking is important. Cars may not be parked along the side of a county road, so cars must be parked on the farm property or a neighbor’s property. A crew should be assigned to greet guests and park the cars.

Attention to customer service will help guests feel welcome, appreciated and taken care of. Farmers should think of ways to “dress up” the farm and the dinner area in order to delight guests. Greet guests as soon as they arrive, be attentive to their needs during the program, thank them for coming as they leave, and invite them to return.

This information was compiled from information presented on the websites of various Farm Dinner operations, and then combined with the personal experience of the author. This information is for education only, and should not be considered legal advice.

VIII. Productive Partnerships

Working together with others – both the obvious partners and more unusual candidates – can help you build a successful and resilient agritourism product or service. Partnerships among similar businesses, such as farms in a particular area, can generate economies of scale for marketing. Partnerships with other hospitality operations, such as chefs, outfitters and guides, can yield incredible and seamless visitor experiences that increase revenue potential. Partnerships with schools and heritage organizations can build local support and enlist community ambassadors that help you diversify your customer base. Partnerships with government and land management agencies can accelerate permitting and access. So many possibilities!

Examples

One of the oldest agritourism collaborations in Oregon, the Hood River Fruit Loop, was organized in 1992 as a self-guided 35-mile driving tour to market farm products and activities as a destination experience. Today, there are more than 30 different attractions, with activities that vary throughout the agricultural season.

Winding Waters River Expeditions in Wallowa County launched in 2005 as a guided river-tour operator. Over time its owners established many partnerships, including local ranches and a farm-to-table dinner company, to create memorable visitor experiences.

The Wild Rivers Coast Farm Trail emerged as a pilot project from broader conversations about connecting local agriculture with local consumers, chefs and visitors on the south coast of Oregon. The first trail promotion was in 2015.

Camas Country Mill in Veneta has grown beyond producing heritage grains to becoming a visitor attraction, by engaging local schools and renovating an old schoolhouse with a crowdfunding campaign.

- Grant’s Getaways Camas Country Mill Travel Oregon Forever project

Sponsored by the High Desert Food and Farm Alliance, the Crooked River Open Pastures (C.R.O.P.) program sponsors a rotating series of weekend tours that draw locals and visitors alike. A local bike shop has partnered with the Alliance not only as a donor, but also to create full-service agritourism tours by bicycle that are marketed beyond the region.

Tips for Building Marketing and Community Partnerships

Excerpted with permission from the 2003 Agri-Tourism Workbook: Agri-Business Council of Oregon

Establishing relationships and cooperative alliances with your community is a key element of long-term success. So:

1. Speak about your project early on with neighbors, family and local businesses. Share your ideas. Listen to their concerns and feedback. Address any problems early in the development of the project.

2. Develop a comfortable level of public presentation. Speak at service clubs, association meetings and other gatherings.

3. See your shortcomings or weaknesses as future partnerships. Inventory your community and seek out those who have what you need to complete your goals. Return the favor.

4. Define who shares potential customers with you. Align yourself with other businesses and attractions, and openly discuss potential customers. Develop exchange promotions and track where your leads come from.

5. Comply with local ordinances – like your mother, government listens to commitments, not complaints. And so do your neighbors. Work through compliance issues as required by law and in the spirit of cooperation with surrounding properties and interests.

6. Engage adversaries. Most simply want to be heard or are afraid of the unknown impacts. Sit down one-on-one and listen. Address the concerns; don’t whitewash over them.

7. Manage physical growth of your operation to ensure quality of life for all citizens affected.

8. Work to foster a sense of community.

9. The greatest achievements happen outside the “system.” Don’t break laws or burn bridges; just be creative!

Agritourism Partnership Self-Assessment

Consider the people, businesses and organizations you work with already, or would like to work with to support your agritourism venture. This worksheet helps you assess what mutual value your current partnerships generate, as well as who else might be a good partner and what you might be able to do together. The columns show a variety of potential collaborative activities, from the least intensive/interdependent to the most. More intensive is not necessarily better: While it can yield great benefits, it requires a high degree of trust and often a lot of time as well. It’s up to you to decide how much collaboration makes sense for you. Here’s how to proceed:

• Start by listing your current partners and check the items that apply to the activities you conduct together. The last three columns ask you to analyze the value of these partnerships: Do you have something valuable to contribute to this partner so you both win? Do you have ideas for working together in new ways? And given your business goals, is this partner a priority for the future?

• After you’ve assessed your current partners, think about potential partners. For example, if you would like to reach visitors from outside your area, perhaps you can partner with a local inn or farm stay. If you want to offer horseback riding, perhaps you can partner with a public park manager. Go through the same steps of identifying the types of activities you could pursue with new partners, the benefits you could offer, and the priority order to approach these potential new partners.

• What do you conclude about the value of partnering for your venture?
